

A Competency Based Curriculum for Specialist Training in Psychiatry

Specialists in Forensic Psychiatry

Royal College of Psychiatrists

February 2010 (updated March 2012)

© Royal College of Psychiatrists 2010

TABLE OF CONTENTS

This curriculum is divided into six Parts:

Parts	Contents	Page Nos
Part I	Curriculum Development & Responsibilities for Curriculum Delivery	7 - 19
Part II	The Core Psychiatry Curriculum	20 - 71
Part III	The Advanced Curriculum for Forensic Psychiatry	72 - 114
Part IV	The Methods of learning & teaching & delivery of the curriculum	115 - 125
Part V	The Assessment System for core & Advanced Training	126 - 131
Part VI	Guide to ARCP Panels for core and advanced training	132 - 169

Contents	Page Nos
Introduction	7 & 8
Rationale	8
Specific features of the curriculum	8 - 10
How the curriculum was developed	10 & 11
Training pathway for General Psychiatry Specialties	11 & 12
Responsibilities for Curriculum Delivery	13 - 19
• Deanery Schools of Psychiatry	13
• Training Programme Directors	13 - 15
• Educational Supervisors/Tutors	15 & 16
• Clinical Supervisors/Trainers	16 & 17
• Assessors	17
• Trainees	17 - 19
CORE PSYCHIATRIC TRAINING – CURRICULUM	20 - 71
INTENDED LEARNING OUTCOMES (ILOS) FOR CORE PSYCHIATRIC TRAINING	20 - 23
ILO 1: Be able to perform specialist assessment of patients and document relevant history and examination on culturally diverse patients to include:	23 - 26
• Presenting or main complaint	
• History of present illness	
• Past medical and psychiatric history	

<ul style="list-style-type: none"> • Systemic review • Family history • Socio-cultural history • Developmental history 	
ILO 2: Demonstrate the ability to construct formulations of patients' problems that include appropriate differential diagnoses	26 – 28
ILO 3: Demonstrate the ability to recommend relevant investigation and treatment in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological and psychological investigations and then to construct a comprehensive treatment plan addressing biological, psychological and socio-cultural domains	28 – 32
ILO 4: Based on a comprehensive psychiatric assessment, demonstrate the ability to comprehensively assess and document patient's potential for self-harm or harm to others. This would include an assessment of risk, knowledge of involuntary treatment standards and procedures, the ability to intervene effectively to minimise risk and the ability to implement prevention methods against self-harm and harm to others. This will be displayed whenever appropriate, including in emergencies	32 – 37
ILO 5: Based on the full psychiatric assessment, demonstrate the ability to conduct therapeutic interviews; that is to collect and use clinically relevant material. The doctor will also demonstrate the ability to conduct a range of individual, group and family therapies using standard accepted models and to integrate these psychotherapies into everyday treatment, including biological and socio-cultural interventions	37 & 38
ILO 6: Demonstrate the ability to concisely, accurately and legibly record appropriate aspects of the clinical assessment and management plan	38 & 39
ILO 7: Develop the ability to carry out specialist assessment and treatment of patients with chronic and severe mental disorders and to demonstrate effective management of these disease states	39 – 41
ILO 8: Use effective communication with patients, relatives and colleagues. This includes the ability to conduct interviews in a manner that facilitates information gathering and the formation of therapeutic alliances	42 – 45
ILO 9: Demonstrate the ability to work effectively with colleagues, including team working	45 & 46
ILO 10: Develop appropriate leadership skills	46
ILO 11: Demonstrate the knowledge, skills and behaviours to manage time and problems effectively	47 – 53
ILO 12: Develop the ability to conduct and complete audit in clinical practice	53 & 54
ILO 13: To develop an understanding of the implementation of clinical governance	55 & 56

ILO 14: To ensure that the doctor is able to inform and educate patients effectively	56 – 59
ILO 15: To develop the ability to teach, assess and appraise	60 – 62
ILO 16: To develop an understanding of research methodology and critical appraisal of the research literature	62 & 63
ILO 17: To ensure that the doctor acts in a professional manner at all times	63 – 69
ILO 18: To develop the habits of lifelong learning	69 & 71
ADVANCED TRAINING IN FORENSIC PSYCHIATRY	72
THE INTENDED LEARNING OUTCOMES FOR SPECIALIST TRAINING IN FORENSIC PSYCHIATRY	73 – 75
<p>ILO 1: Be able to perform specialist assessment of patients and document relevant history and examination on culturally diverse patients to include:</p> <ul style="list-style-type: none"> • Presenting or main complaint • History of present illness • Past medical and psychiatric history • Systemic review • Family history • Socio-cultural history • Developmental history 	75 - 77
ILO 2: The doctor will demonstrate the ability to construct formulations of patients' problems that include appropriate differential diagnoses, liaising with other specialists and making appropriate referrals	78 & 79
ILO 3: The doctor will demonstrate the ability to recommend relevant investigation and treatment in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological, socio-cultural and psychological investigations and then to construct a comprehensive treatment plan addressing biological, psychological and socio-cultural domains	79 - 81
ILO 4: Based on a comprehensive psychiatric assessment, demonstrate the ability to comprehensively assess and document patient's potential for self-harm or harm to others. This would include an assessment of risk, knowledge of involuntary treatment standards and procedures, the ability to intervene effectively to minimise risk and the ability to implement prevention methods against self-harm and harm to others. This will be displayed whenever appropriate, including in emergencies	81 – 88
ILO 5: Based on the full psychiatric assessment, demonstrate the ability to conduct therapeutic interviews; that is to collect and use clinically relevant material. The doctor will also demonstrate the ability to conduct a range of individual, group and family therapies using standard accepted models and to integrate these psychotherapies into everyday treatment, including biological and socio-cultural interventions	89 & 90

ILO 7: Develop the ability to carry out specialist assessment and treatment of patients with chronic and severe mental disorders and to demonstrate effective management of these disease states	91 & 92
ILO 8: Demonstrate effective communication with patients, relatives and colleagues. This includes the ability of the doctor to conduct interviews in a manner that facilitates information gathering and the formation of therapeutic alliances	92-94
ILO 9: To demonstrate the ability to work effectively with colleagues, including team working	94 – 97
ILO 10: Develop appropriate leadership skills	97 – 100
ILO 11: Demonstrate the knowledge, skills and behaviours to manage time and problems effectively	100 & 101
ILO 12: To develop the ability to conduct and complete audit in clinical practice	101 & 102
ILO 13: To develop an understanding of the implementation of clinical governance	103 & 104
ILO 15: To develop the ability to teach, assess and appraise	105 – 107
ILO 16: To develop an understanding of research methodology and critical appraisal of the research literature	107 - 111
ILO 17: Ensure that you act in a professional manner at all times	112 - 114
Methods of Learning and Teaching	115 - 125
Appropriately supervised clinical experience	115 & 116
General Psychiatry	116 & 117
General psychiatry sub-specialties	117
Psychiatry of old age	117
Forensic psychiatry	118
Psychiatry of learning disability	118
Child and adolescent psychiatry	118 & 119
The clinical experience in the Advanced Training Programme in Forensic Psychiatry	119 & 120

Psychotherapy training	120 – 125
The aim of psychotherapy training	120 & 121
Case based discussion groups	121
Undertaking specific training experiences	121 & 122
Emergency Psychiatry	122 & 123
Interview skills	123
Learning in formal situations	123
Experience of teaching	123 & 124
Management experience	124
ECT Training	124
Research	124
Special Interest Sessions	124 & 125
Assessment system for Core Psychiatry Training & Advanced Training in Forensic Psychiatry	126 – 130
WPBA for Advanced Trainees	130
Decisions on progress, the ARCP	131
Guide for ARCP Panels in Core Psychiatry Training for CT1 – CT3	132 – 148
Guide for ARCP panels in Advanced Training in Forensic Psychiatry ST4-ST6	149 - 168

Specialists in forensic psychiatry work with others to assess, manage and treat people with mental disorders, associated with offending and dangerous behaviour. On completion of a competency based training, specialists in forensic psychiatry will be able to:

- Contribute to the assessment, treatment and management of forensic psychiatry patients within the relevant multidisciplinary team in collaboration with other agencies.
- Contribute to the development and delivery of effective and comprehensive forensic psychiatry services.
- Demonstrate knowledge and application of law and relevant aspects of criminology to forensic, psychiatric practice.
- Demonstrate expertise, knowledge and application of diversity issues in relation to forensic psychiatry, including gender, ethnicity, culture and special needs.
- Demonstrate knowledge and application of organisation management to forensic psychiatry services. Demonstrate knowledge and application of clinical governance to forensic psychiatric practice.

1. Introduction

Defining the objectives of the skills of all psychiatrists in training has relied on a number of documents; *Good Medical Practice* produced by the GMC, *Good Psychiatric Practice* produced by the Royal College of Psychiatrists (2009), the *Medical Leadership Competency Framework*; *The Core & General Training Curriculum* published in 2007, the draft curricula statements and outlines produced by faculties and sections of the Royal College of Psychiatrists, as well as *The Curriculum for Basic Training* from the Royal Australian & New Zealand College of Psychiatrists, *The Handbook of Psychiatric Education and Faculty Development* published by the American Psychiatric Association, *The CANMED 2005 Framework & Curricula for training from other medical specialties in the UK*, notably general practice and general medicine.

What is set out in this document is the generic knowledge, skills and attitudes, or more readily assessed behaviour, that we believe is common to all psychiatric specialties, together with those that are specific to specialists in Forensic Psychiatry. This document should be read in conjunction with *Good Medical Practice* and *Good Psychiatric Practice*, which describe what is expected of all doctors and psychiatrists. Failure to achieve satisfactory progress in meeting many of

these objectives at the appropriate stage would constitute cause for concern about the doctor's ability to be adequately trained.

Achieving competency in core and generic skills is essential for all specialty and subspecialty training. Maintaining competency in these will be necessary for relicensing and recertification, linking closely to the details in *Good Medical Practice* and *Good Psychiatric Practice*. Therefore doctors in training in General Psychiatry will need to continue to display the competencies that were acquired in Core Psychiatry Training throughout their training.

2. Rationale

The purposes of the curriculum are to outline the competencies that trainees must demonstrate and the learning and assessment processes that must be undertaken:

- To complete Core Psychiatry Training
- For an award of a certificate of completion of training (CCT) in Forensic Psychiatry. The curriculum builds upon competencies gained in Foundation Programme training and Core Psychiatry Training and guides the doctor to continuing professional development based on *Good Psychiatric Practice* after they have gained their CCT.

3. Specific features of the curriculum

The curriculum is outcome-based and is learner-centred. Like the Foundation Programme Curriculum, it is a spiral curriculum in that learning experiences revisit learning outcomes. Each time a learning outcome is revisited in the curriculum, the purpose is to support the trainee's progress by encouraging performance in situations the trainee may not have previously encountered, in more complex and demanding situations and with increasing levels of autonomy. The details of how the Curriculum supports progress is described in more detail in the two Guides to ARCP panels (the Core Psychiatry and Advanced Training in Forensic Psychiatry guides) that are set out later. The intended learning outcomes of the curriculum are structured under the CanMEDS (2005) headings that set out a framework of professional competencies. These can be mapped to the headings of *Good Medical Practice*, which were used in the first edition of this curriculum, but CanMEDS has been found to form a more practical structure.

The curriculum is learner-centred in the sense that it seeks to allow trainees to explore their interests within the outcome framework, guided and supported by an educational supervisor. The Royal College of Psychiatrists has long recognised the importance of educational supervision in postgraduate training. For many years, the College recommended that all trainees should have an hour per week of protected time with their educational supervisor to set goals for training, develop individual learning plans, provide feedback and validate their learning.

The competencies in the curriculum are arranged under the CanMEDS headings as follows: -

1. MEDICAL EXPERT
2. COMMUNICATOR
3. COLLABORATOR
4. MANAGER
5. HEALTH ADVOCATE
6. SCHOLAR
7. PROFESSIONAL

They are, of course, not discrete and free-standing, but overlap and inter-relate to produce an overall picture of the Psychiatrist as a medical expert.

It is important to recognise that these headings are used for structural organization only. The complexity of medical education and practice means that a considerable number of the competencies set out below will cross the boundaries

between different categories, as the diagram above illustrates. Moreover, depending on circumstances, many competencies will have additional components or facets that are not defined here. This curriculum is based on meta-competencies and does not set out to define the psychiatrist's progress and attainment at a micro-competency level. To do so would result in a document of quite impracticable length and detail which would almost inevitably require constant revision.

With these points in mind, this curriculum is based on a model of intended learning outcomes (which are summarised below) with specific competencies given to illustrate how these outcomes can be demonstrated. It is, therefore, a practical guide rather than an all-inclusive list of prescribed knowledge, skills and behaviours.

4. How the curriculum was developed

The Royal College of Psychiatrists commenced work on a revision of the curriculum almost immediately upon completion of first approved document. This was because the College felt that the first document was uneven in its coverage of clinical and non-clinical domains and that the structure did not easily lend itself to the psychosocial aspects of the specialty. Feedback from trainers and trainees confirmed this impression, as well as giving a message about difficulties with navigation and an overall problem with "user friendliness".

The College Curriculum Committee, which includes lay membership, had a small working group led by one of the Associate Deans; this working group involved the Dean, Chief Examiner, Chair of the Trainees Committee and College Educational Advisor. The group worked at all times closely with faculties with whom it held individual meetings to explore reception of the current curriculum, suggestions for improvement, and thoughts on progress with regard to in-service assessment. These meetings were held individually, faculty by faculty, and special interest group by special interest group. The group's work was also discussed within the regular meeting of the Heads of Postgraduate School's of Psychiatry, a group that facilitates communication between the College and the national faculty of psychiatric educators. The group consulted with the College Education Training and Standards Committee, which is the central committee within the Royal College of Psychiatrists for all matters in post-graduate medical education, as well as the College Modernising Medical Careers Working Group. This was to ensure that developments were in-line with any other structural changes in training and career pathways.

The group proposed a number of different models for the curriculum and felt that the CANMED's model afforded the right way ahead for psychiatry at this point in time. However, the approach of a mixed economy was taken as the views and arguments of some individuals and specialties around the fact that they felt that changing the format may initially lose some important changes to content and thus the presentation of specialties in slightly different formats and varying degrees of detail in terms of content.

The work has proceeded in consultation with the above mentioned groups, as well as those involved intimately in the day to day delivery of teaching and training, including the college tutors and training programme directors, and, most importantly, those involved in learning, the trainees. Presentations have been made at key meetings, for example, the College Annual Medical Education Conference and discussions and feedback received. These consultations were incorporated in the document presented to PMETB in October 2008.

The next stage, in terms of communication, will be a strategy for implementation. The College has learned from its successful approach to the implementation of workplace based assessments (success that was reflected in the PMETB trainer survey of 2007/8) and will be undertaking a UK wide exercise communicating the content and use of the curriculum, including up-dated information on the assessment programme to fit with examinations and the ARCP and quality management. This work will be lead by a College Associate Dean and Educational Policy Advisor.

The development of the curriculum is a continuing process that involves a wide community including lay people, trainees, medical managers, psychiatry experts, and trainers. The College Education Training and Standards Committee (ETSC) delegated the governance of the curriculum to the Curriculum Committee, which will coordinate the input of all these groups. Each College Faculty has an Education and Curriculum Committee (FECC), which is charged with monitoring its Specialty or Sub-specialty Curriculum. From 2009 onwards, every FECC will host an annual meeting of their Training Programme Directors to review the implementation of its Curriculum. The FECCs will report to the Curriculum Committee. The Curriculum Committee also receives input from the College Quality Assurance Committee, which provides the College Annual Specialty Report, from the College Psychiatry Trainees' Committee and from the College Medical Managers' Group. In 2011, after two cycles of annual review, the Curriculum Committee will host a symposium at the autumn College Medical Education Conference to consolidate our learning about the curriculum and to launch the next phase in its evolution.

5. Training pathway

Trainees enter General Psychiatry Specialty Training after successfully completing both the Foundation Training Programme (or having evidence of equivalence) and the Core Psychiatry Training programme. The progression is shown in Figure 1.

Psychiatry training was 'decoupled' in August 2008. Since that date, trainees have had to successfully complete the three-year Core Psychiatry Training programme before applying in open competition for a place in a programme leading to a certificate of completion of training (CCT) in one of the six psychiatry specialties. Trainees who were appointed to Psychiatry Specialty Training prior to August 2008 were generally appointed to 'run-through' training posts. The content

of their learning and assessment in Forensic Psychiatry is essentially the same as 'decoupled' trainees except that they do not apply to a post in Forensic Psychiatry in open competition. Instead, Schools of Psychiatry will have internal systems for selecting into advanced training programmes.

*Selection at this point may be by open or by internal competition. See text for explanation

Figure 1, Training pathway to obtain a CCT in Forensic Psychiatry

At the present time, **the six psychiatry** specialties are Child and Adolescent Psychiatry, Forensic Psychiatry, General Psychiatry, Old Age Psychiatry, the Psychiatry of Learning Disability and Medical Psychotherapy. In addition, there are three **sub-specialties of General Psychiatry: Substance Misuse Psychiatry, Liaison Psychiatry and Rehabilitation Psychiatry**. Specialty training in Forensic Psychiatry is therefore one of the options that a trainee may apply to do after completing Core Psychiatry Training.

RESPONSIBILITIES FOR CURRICULUM DELIVERY

It is recognised that delivering the curriculum requires the coordinated efforts of a number of parties. Postgraduate Schools of Psychiatry, Training Programme Directors, Educational and Clinical Supervisors and trainees all have responsible for ensuring that the curriculum is delivered as intended.

1. Deanery Schools of Psychiatry

Schools of Psychiatry have been created to deliver postgraduate medical training in England, Wales and Northern Ireland. The Postgraduate Deanery manages the schools with advice from the Royal College. There are no Schools of Psychiatry in Scotland. Scotland has four Deanery Specialty Training Committees for mental health that fulfil a similar role.

The main roles of the schools are:

1. To ensure all education, training and assessment processes for the psychiatry specialties and sub-specialties meet Postgraduate Medical Education and Training Board (PMETB) approved curricula requirements
2. To monitor the quality of training, ensuring it enhances the standard of patient care and produces competent and capable specialists
3. To ensure that each **Core Psychiatry Training Programme has an appropriately qualified psychotherapy tutor** who should be a consultant psychotherapist or a consultant psychiatrist with a special interest in psychotherapy.
4. To encourage and develop **educational research**
5. **To promote diversity and equality of opportunity**
6. To work with the Postgraduate Deanery to identify, assess and support trainees in difficulty
7. To ensure that clear, effective processes are in place for trainees to raise concerns regarding their training and personal development and that these processes are communicated to trainees

2. Training Programme Directors

The Coordinating/Programme Tutor or Programme Director is responsible for the **overall strategic management** and quality control of the Forensic Psychiatry programme within the Training School/Deanery. The Deanery (Training School) and the relevant Service Provider (s) should appoint them jointly. They are directly responsible to the Deanery (School) but also have levels of accountability to the relevant service providers(s). With the increasing complexity of training and

the more formal monitoring procedures that are in place, the role of the Programme Director/Tutor must be recognized in their job plan, with time allocated to carry out the duties adequately. One programmed activity (PA) per week is generally recommended for 25 trainees. In a large scheme 2 PA's per week will be required. The Training Programme Director for Forensic Psychiatry:

1. Should inform and support College and Specialty tutors to ensure that all aspects of clinical placements fulfil the specific programme requirements.
2. Oversees the progression of trainees through the programme and devises mechanisms for the delivery of co-ordinated educational supervision, pastoral support and career guidance.
3. Manages trainee performance issues in line with the policies of the Training School/Deanery and Trust and support trainers and tutors in dealing with any trainee in difficulty.
4. Ensures that those involved in supervision and assessment are familiar with programme requirements.
5. Will provide clear evidence of the delivery, uptake and effectiveness of learning for trainees in all aspects of the curriculum.
6. Should organise and ensure delivery of a teaching programme based on the curriculum covering clinical, specialty and generic topics.
7. Will attend local and deanery education meetings as appropriate.
8. Will be involved in recruitment of trainees.
9. Ensures that procedures for consideration and approval of LTFT (Less Than Full Time Trainees), OOPT (Out of Programme Training) and OOPR (Out of Programme Research) are fair, timely and efficient.
10. Records information required by local, regional and national quality control processes and provides necessary reports.
11. Takes a lead in all aspects of assessment and appraisal for trainees. This incorporates a lead role in organisation and delivery of ARCP. The Tutor/Training Programme Director will provide expert support, leadership and training for assessors (including in WPBA) and ARCP panel members.

There should be a Training Programme Director for the School/Deanery Core Psychiatry Training Programme who will undertake the above responsibilities with respect to the Core Psychiatry Programme and in addition:

1. Will implement, monitor and improve the core training programmes in the Trust(s) in conjunction with the Directors of Medical Education and the Deanery and ensure that the programme meets the requirements of the curriculum and the Trust and complies with contemporary College Guidance & Standards (see College QA Matrix) and PMETB Generic Standards for Training.
2. Will take responsibility with the Psychotherapy Tutor (where one is available) for the provision of appropriate psychotherapy training experiences for trainees. This will include:

- Ensuring that educational supervisors are reminded about and supported in their task of developing the trainee's competencies in a psychotherapeutic approach to routine clinical practice.
- Advising and supporting trainees in their learning by reviewing progress in psychotherapy
- Ensuring that there are appropriate opportunities for supervised case work in psychotherapy.

3. Educational Supervisors/Tutors

An Educational Supervisor/tutor is a Consultant, Senior Lecturer or Professor who has been appointed to a substantive consultant position. They are responsible for the educational supervision of one or more doctors in training who are employed in an approved training programme. The Educational Supervisor will require specific experience and training for the role. Educational Supervisors will work with a small (no more than five) number of trainees. Sometimes the Educational Supervisor will also be the clinical supervisor/trainer, as determined by explicit local arrangements.

All trainees will have an Educational Supervisor whose name will be notified to the trainee. The precise method of allocating Educational Supervisors to trainees, i.e. by placement, year of training etc, will be determined locally and will be made explicit to all concerned.

The educational supervisor/tutor:

1. Works with individual trainees to develop and facilitate an individual learning plan that addresses their educational needs. The learning plan will guide learning that incorporates the domains of knowledge, skills and attitudes.
2. Will act as a resource for trainees who seek specialty information and guidance.
3. Will liaise with the Specialty/Programme tutor and other members of the department to ensure that all are aware of the learning needs of the trainee.
4. Will oversee and on occasions, perform, the trainee's workplace-based assessments.
5. Will monitor the trainee's attendance at formal education sessions, their completion of audit projects and other requirements of the Programme.
6. Should contribute as appropriate to the formal education programme.
7. Will produce structured reports as required by the School/Deanery.
8. In order to support trainees, will: -
 - a) Oversee the education of the trainee, act as their mentor and ensure that they are making the necessary clinical and educational progress.
 - b) Meet the trainee at the earliest opportunity (preferably in the first week of the programme), to ensure that the trainee understands the structure of the programme, the curriculum, portfolio and system of assessment and to establish a supportive relationship. At this first meeting the educational agreement should be discussed with the trainee and the necessary paperwork signed and a copy kept by both parties.

- c) Ensure that the trainee receives appropriate career guidance and planning.
- d) Provide the trainee with opportunities to comment on their training and on the support provided and to discuss any problems they have identified.

4. Clinical Supervisors/Trainers

A clinical supervisor/trainer is a consultant, senior lecturer or professor who has been appointed to a substantive consultant position.

Clinical supervision must be provided at a level appropriate to the needs of the individual trainee. **No trainee should be expected to work to a level beyond their competence and experience.** (*PMETB Generic Standards for Training, 2007, PMETB Standards for Trainers, 2008*).

The clinical supervisor/trainer works with the trainee not solely for the benefit of patients for whom they are jointly responsible but also works with the trainee to foster the professional development (e.g. clinical and personal skills) of the individual doctor in training. **Clinical supervisors work in close collaboration with the nominated Educational Supervisor (if they are not the same person)**

Supervision of clinical activity must be appropriate to the competence and experience of the individual trainee; no trainee should be required to assume responsibility for or perform clinical techniques in which they have insufficient experience and expertise; trainees should only perform tasks without direct supervision when the supervisor is satisfied regarding their competence so to do; **both trainee and supervisor should at all times be aware of their direct responsibilities for the safety of patients in their care.**

The clinical supervisor:

1. Ensures that specialty and departmental induction occurs
2. Should be involved with teaching and training the trainee in the workplace and should help with both professional and personal development.
3. Must support the trainee in various ways:
 - a) direct supervision, in the ward, the community or the consulting room
 - b) close but not direct supervision, e.g. in the next door room, reviewing cases and process during and/or after a session
 - c) regular discussions, review of cases and feedback
4. May delegate some clinical supervision to other members of clinical team as long as the team member clearly

understands the role and the trainee is informed. The trainee must know who is providing clinical supervision at all times.

5. Will **perform workplace-based assessments for the trainee** and will delegate performance of WPBA's to appropriate members of the multi-disciplinary team
6. Will provide regular review during the placement, both formally and informally to ensure that the trainee is obtaining the necessary experience. This will include ensuring that the trainee obtains the required supervised experience in practical procedures and receives regular constructive feedback on performance.
7. Will produce structured reports as required by the School/Deanery
8. Will hold a documented one-hour meeting with the trainee per week. This is regarded as a minimum; there can be other ad hoc meetings. As described above the fixed "one-hour per week" meeting is focussed on the trainee doctor's personal learning and development needs.
9. Make clear arrangements for cover in the event of planned absence.

The time required to discharge these responsibilities is estimated as 0.25PA's per week per trainee. This time must be identified in the supervisor/trainer's job plan and should be allocated from within the 'Direct Clinical Care' category.

5. Assessors

Assessors are members of the healthcare team, who need not be educational or clinical supervisors, who perform workplace-based assessments (WPBA's) for trainee psychiatrists. In order to perform this role, assessors must be competent in the area of practice that they have been asked to assess and they should have received training in assessment methods. The training will include standard setting, a calibration exercise and observer training. Assessors should also have up to date training in equality and diversity awareness. While it is desirable that all involved in the training of doctors should have these elements of training, these stipulations do not apply to those members of the healthcare team that only complete multi-source feedback forms (mini-PAT) for trainees.

6. Trainees

1. Must at all times act professionally and take appropriate responsibility for patients under their care and for their training and development.
2. Must ensure they attend the one **hour of personal supervision per week**, which is **focused on discussion of individual training matters and** not immediate clinical care. If this personal supervision is not occurring the trainee should discuss the matter with their educational supervisor/tutor or training programme director.
3. Must receive clinical supervision and support with their clinical caseload appropriate to their level of experience and training.
4. Should be aware of and ensure that they have access to a range of learning resources including:

- a) a local training course (e.g. MRCPsych course, for Core Psychiatry trainees)
 - b) a local postgraduate academic programme
 - c) the opportunity (and funding) to attend courses, conferences and meetings relevant to their level of training and experience
 - d) appropriate library facilities
 - e) the advice and support of an audit officer or similar
 - f) supervision and practical support for research with protected research time appropriate to grade
5. Must make themselves familiar with all aspects of the curriculum and assessment programme and keep a portfolio of evidence of training.
6. Must ensure that they make it a priority to obtain and profit from relevant experience in psychotherapy.
7. **Must collaborate with their personal clinical supervisor/trainer to:**
- a) work to a signed educational contract
 - b) maximize the educational benefit of weekly educational supervision sessions
 - c) undertake workplace-based assessments, both assessed by their clinical supervisor and other members of the multidisciplinary team
 - d) use constructive criticism to improve performance
 - e) regularly review the placement to ensure that the necessary experience is being obtained
 - f) discuss pastoral issues if necessary
8. **Must have regular contact with their Educational Supervisor/tutor to:**
- a) agree educational objectives for each post
 - b) develop a personal learning and development plan with a signed educational contract
 - c) ensure that workplace-based assessments and other means of demonstrating developing competence are appropriately undertaken
 - d) review examination and assessment progress
 - e) regularly refer to their portfolio to inform discussions about their achievements and training needs
 - f) receive advice about wider training issues
 - g) have access to long-term career guidance and support
9. Will participate in an Annual Review of Competence Progression (ARCP) to determine their achievement of competencies and progression to the next phase of training.
10. Should ensure adequate representation on management bodies and committees relevant to their training. This would include Trust clinical management forums, such as Clinical Governance Groups, as well as mainstream training management groups at Trust, Deanery and National (e.g. Royal College) levels.
11. On appointment to a specialty training programme the trainee must fully and accurately complete Form R and return it to the Deanery with a coloured passport size photograph. The return of Form R confirms that the trainee

is signing up to the professional obligations underpinning training. Form R will need to be updated (if necessary) and signed on an annual basis to ensure that the trainee re-affirms his/her commitment to the training and thereby remains registered for their training programme.

12. Must send to the postgraduate dean a signed copy of the Conditions of Taking up a training post, which reminds them of their professional responsibilities, including the need to participate actively in the assessment process. The return of the Form R initiates the annual assessment outcome process.
13. Trainees must ensure they keep the following records of their training:
 - Copies of all Form Rs for each year of registering with the deanery.
 - Copies of ARCP forms for each year of assessment.
 - Any correspondence with the postgraduate deanery in relation to their training.
 - Any correspondence with the Royal College in relation to their training.
14. Must inform the postgraduate dean and the Royal College of Psychiatrists of any changes to the information recorded.
15. Must make themselves aware of local procedures for reporting concerns about their training and personal development and when such concerns arise, they should report them in a timely manner.

CORE PSYCHIATRY TRAINING

The purpose of Core Specialty Training in psychiatry is to prepare the practitioner for entering Advanced Training; it must therefore provide an essential range of competencies. These competencies include knowledge of common psychiatric disorders and their treatment as well as skill in a range of assessment and therapeutic approaches. The competencies must be gained through working in a range of service settings, across the development range, and must include direct experience of delivering psychological therapy.

Core psychiatric competencies are indicated in blue script.

Some Core competencies are coloured red. These must be completed by the end of the first year of Core Psychiatry training; they are also relevant to trainees in other specialties (eg General Practice) who are in a psychiatry placement.

Psychiatry trainees must achieve both the red and blue competencies (which will be assessed by workplace based assessments, the MRCPsych examinations, or both) before being eligible to enter advanced training in psychiatry.

THE INTENDED LEARNING OUTCOMES FOR CORE PSYCHIATRIC TRAINING

Intended learning outcome 1

Be able to perform specialist assessment of patients and document relevant history and examination on culturally diverse patients to include:

- **Presenting or main complaint**
- **History of present illness**
- **Past medical and psychiatric history**
- **Systemic review**
- **Family history**
- **Socio-cultural history**
- **Developmental history**

Intended learning outcome 2

Demonstrate the ability to construct formulations of patients' problems that include appropriate differential diagnoses

Intended learning outcome 3

Demonstrate the ability to recommend relevant investigation and treatment in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological and psychological investigations and then to construct a comprehensive treatment plan addressing biological, psychological and socio-cultural domains

Intended learning outcome 4

Based on a comprehensive psychiatric assessment, demonstrate the ability to comprehensively assess and document patient's potential for self-harm or harm to others. This would include an assessment of risk, knowledge of involuntary treatment standards and procedures, the ability to intervene effectively to minimise risk and the ability to implement prevention methods against self-harm and harm to others. This will be displayed whenever appropriate, including in emergencies

Intended learning outcome 5

Based on the full psychiatric assessment, demonstrate the ability to conduct therapeutic interviews; that is to collect and use clinically relevant material. The doctor will also demonstrate the ability to conduct a range of individual, group and family therapies using standard accepted models and to integrate these psychotherapies into everyday treatment, including biological and socio-cultural interventions

Intended learning outcome 6

Demonstrate the ability to concisely, accurately and legibly record appropriate aspects of the clinical assessment and management plan

Intended learning outcome 7

Develop the ability to carry out specialist assessment and treatment of patients with chronic and severe mental disorders and to demonstrate effective management of these disease states

Intended learning outcome 8

Use effective communication with patients, relatives and colleagues. This includes the ability to conduct interviews in a manner that facilitates information gathering and the formation of therapeutic alliances

Intended learning outcome 9

Demonstrate the ability to work effectively with colleagues, including team working

Intended learning outcome 10

Develop appropriate leadership skills

Intended learning outcome 11

Demonstrate the knowledge, skills and behaviours to manage time and problems effectively

Intended learning outcome 12

Develop the ability to conduct and complete audit in clinical practice

Intended learning outcome 13

Develop an understanding of the implementation of clinical governance

Intended learning outcome 14

Ensure that you are able to inform and educate patients effectively

Intended learning outcome 15

Develop and utilise the ability to teach, assess and appraise

Intended learning outcome 16

Develop an understanding of research methodology and critical appraisal of the research literature

Intended learning outcome 17

Ensure that you act in a professional manner at all times

Intended learning outcome 18

Develop the habits of lifelong learning

1. MEDICAL EXPERT

DESCRIPTION: Medical expertise integrates the knowledge, clinical skills, procedural skills and professional behaviours that are fundamental to excellent patient care. In other words this describes what the psychiatrist needs to do, how they do it, when they do it and the manner in which they work

HISTORY, EXAMINATION, INVESTIGATIONS, TREATMENT (THERAPEUTICS) AND RECORD KEEPING**Intended learning outcome 1**

Be able to perform specialist assessment of patients and document relevant history and examination on culturally diverse patients to include:

- Presenting or main complaint
- History of present illness
- Past medical and psychiatric history
- Systemic review
- Family history
- Socio-cultural history
- Developmental history

1-1a Clinical history	Assessment methods	GMP Domains
<p>Knowledge</p> <p>Define signs and symptoms found in patients presenting with psychiatric and common medical disorders</p> <p>Recognise the importance of historical data from multiple sources</p>	<p>ACE, mini-ACE, CBD, MCQ, CASC</p> <p>Mini-ACE, CBD</p>	<p>1</p>
<p>Skills</p> <p>Elicit a complete clinical history, including psychiatric history, that identifies the main or chief complaint, the history of the present illness, the past psychiatric history, medications, general medical history, review of systems, substance abuse history, forensic history, family history, personal, social and developmental history</p> <p>Overcome difficulties of language, physical and sensory impairment</p> <p>Gather this factual information whilst understanding the meaning these facts hold for the patient and eliciting the patient's narrative of their life experience</p>	<p>ACE, mini-ACE, CASC</p> <p>ACE, mini-ACE, CASC</p> <p>ACE, mini-ACE, CASC</p>	<p>1</p>
<p>Attitudes demonstrated through behaviours</p> <p>Show empathy with patients. Appreciate the interaction and importance of psychological, social and spiritual factors in patients and their support networks</p>	<p>ACE, mini-ACE, CASC</p>	<p>1</p>
1-1b Patient examination, including mental state examination & physical examination	Assessment Methods	GMP Domains
<p>Knowledge</p>		<p>1</p>

Define the components of mental state examination using established terminology	ACE, mini-ACE, CBD, CP, CASC	
Recognise physical signs and symptoms that accompany psychiatric disorders	ACE, mini-ACE, CASC	
Recognise and identify the different types of mental distress and their phenomenology	ACE, mini-ACE, CASC	
Recognise how the stage of cognitive and emotional development may influence the aetiology, presentation and management of mental health problems	ACE, mini-ACE, CBD, CP, CASC	
Skills		
Perform a reliable and appropriate examination including the ability to obtain historical information from multiple sources, such as family and other members of the patient's social network, community mental health resources, old records	ACE, mini-ACE, CASC	1
Elicit and record the components of mental state examination	ACE, mini-ACE, CBD, CASC	
Make a clear and concise case presentation	CBD, CP, CASC	
Assess for the presence of general medical illness	ACE, mini-ACE, CBD, CASC	
Recognise and identify the effects of psychotropic medication in the physical examination	ACE, mini-ACE, CBD, CASC	
Attitudes demonstrated through behaviours		1
Respect patients' dignity and confidentiality	ACE, mini-ACE,	

Acknowledge cultural issues	CASC	
Appropriately involve family members	ACE, mini-ACE, CBD, CASC	
Demonstrate an understanding of the importance of working with other Health and Social Care professionals and team working	ACE, mini-ACE, CASC	
Show a willingness to provide explanation to patients of investigations and their possible unwanted effects	CBD, CP, CASC	
	ACE, mini-ACE, CASC	

Intended learning outcome 2

Demonstrate the ability to construct formulations of patients' problems that include appropriate differential diagnoses

1-2a Diagnosis	Assessment methods	GMP Domains
Knowledge		1
State the typical signs and symptoms of common psychiatric disorders including affective disorders; anxiety disorders; disorders of cognitive impairment; psychotic disorders; personality disorders; substance misuse disorders; and organic disorders	ACE, Mini-ACE, CBD, MCQ, CASC	
Be familiar with contemporary ICD or DSM diagnostic systems with the ability to discuss the advantages and limitations of each	CBD, CP, MCQ, CASC	
State the typical signs and symptoms of psychiatric disorders as they manifest	CBD, CP, MCQ	

across the age range, including affective disorders; anxiety disorders; disorders of cognitive impairment; psychotic disorders; personality disorders; substance misuse disorders; organic disorders; developmental disorders; and common disorders in childhood	CASC	
Skills Use the diagnostic system to accurately construct a differential diagnosis for common presenting problems Use the diagnostic system accurately in identifying specific signs and symptoms that comprise syndromes and disorders across the age range Formulate and discuss differential diagnosis	CBD, CP, MCQ CBD, CP, CASC CBD, CP, CASC	1
Attitudes demonstrated through behaviours Show an awareness of the advantages and limitations of using a diagnostic system	CBD, CP, CASC	1

1-2b Formulation	Assessment methods	GMP Domains
Knowledge Describe the various biological, psychological and social factors involved in the predisposition to, the onset of and the maintenance of common psychiatric disorders that affect adult patients Describe the various biological, psychological and social factors involved in the predisposition to, the onset of and the maintenance of psychiatric disorders across the age range	CBD, CP, CASC CBD, CP, CASC	1
Skills Integrate information from multiple sources to formulate the case into which	CBD, CP, CASC	1

relevant predisposing, precipitating, perpetuating and protective factors are highlighted		
Attitudes demonstrated through behaviours		1
Provide explanation to the patient and the family which enables a constructive working relationship	ACE, mini-ACE, CBD, CASC	

Intended learning outcome 3
Demonstrate the ability to recommend relevant investigation and treatment in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological and psychological investigations and then to construct a comprehensive treatment plan addressing biological, psychological and socio-cultural domains

1-3a Individual consideration	Assessment methods	GMP Domains
Knowledge		1
Skills		1
Develop an individualised assessment and treatment plan for each patient and in collaboration with each patient	ACE, Mini-ACE, CBD, CASC	
Attitudes demonstrated through behaviours		1
Be able to explain to patients, families, carers and colleagues the process and outcome of assessment, investigation and treatment or therapeutic plan	ACE, Mini-ACE, CASC	

1-3b Investigation	Assessment methods	GMP Domains
Define the indications for the key investigations that are used in psychiatric	CBD, CP, MCQ	1

<p>practice</p> <p>Define the risks and benefits of investigations, including those of psychotherapeutic and genetic investigations</p> <p>Demonstrate knowledge of the cost effectiveness of individual investigations</p>	<p>CBD, CP, MCQ</p> <p>CBD, CP, MCQ, CASC</p>	
<p>Skills</p> <p>Interpret the results of investigations</p> <p>Liaise and discuss investigations with colleagues in the multi-professional team in order to utilise investigations appropriately</p>	<p>CBD, CP, MCQ, CASC</p> <p>CBD, CP, MCQ, CASC</p>	1
Attitudes demonstrated through behaviours		1

1-3c Treatment Planning	Assessment methods	GMP Domains
<p>Knowledge</p> <p>Explain the evidence base for physical and psychological therapies including all forms of psychotherapies, brief therapy, cognitive behavioural therapy, psychodynamic therapy, psychotherapy combined with psychopharmacology, supportive therapy and all delivery systems of psychotherapy (that is individual, group and family)</p> <p>Show a clear understanding of physical treatments including pharmacotherapy, including pharmacological action, clinical indication, side-effects, drug interactions, toxicities, appropriate prescribing practices, and cost effectiveness; electro-convulsive therapy and light therapy</p>	<p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p>	1

<p>Show a clear understanding of the doctor/ patient relationship and its impact on illness and its treatment</p> <p>Apply knowledge of the implications of coexisting medical illnesses to the treatment of patients who have psychological disorders</p> <p>Demonstrate knowledge of CPA (Care Programme Approach) processes</p>	<p>ACE, Mini-ACE, CBD, CP, MCQ, CASC, CBDGA</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>CBD, CP, MCQ, CASC</p>	
<p>Skills</p> <p>Accurately assess the individual patient's needs and whenever possible in agreement with the patient, formulate a realistic treatment plan for each patient for adult patients with common presenting problems.</p> <p>Be able to do the above with psychiatric problems as they present across the age range</p> <p>Educate patients, carers and other professionals about relevant psychiatric and psychological issues</p> <p>Demonstrate an understanding of how professional and patient perspectives may differ and the impact this may have on assessment and treatment</p> <p>Explain to patients what is involved in receiving the full range of psychiatric treatments and manage their expectations about these treatments described under 'knowledge'</p>	<p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, CP, CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC, CBDGA</p> <p>ACE, Mini-ACE, CBD, CASC</p>	<p>1</p>

<p>Monitor patients' clinical progress and re-evaluate diagnostic and management decisions to ensure optimal care</p> <p>Be skilled in multi-agency working</p>	<p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, CBD, CP</p>	
<p>Attitudes demonstrated through behaviours</p> <p>Show appropriate behaviour towards patients and their symptoms and be conscious of socio-cultural contexts</p> <p>Clearly and openly explain treatments and their side-effects.</p> <p>Demonstrate an understanding of the impact of their own feelings and behaviour on assessment and treatment</p> <p>Show respect for the patient's autonomy and confidentiality while recognising responsibility towards safeguarding others</p> <p>Recognise, value and utilise the contribution of peers and multi-disciplinary colleagues to develop the effectiveness of oneself and others</p> <p>Provide care and treatment that recognises the importance to patients of housing, employment, occupational opportunities, recreational activities, advocacy, social networks and welfare benefits</p> <p>Ensure that the employment of legal powers for detention (or to enforce treatment) balances the duty of care to the patient and the protection of others</p>	<p>ACE, Mini-ACE, CBD, CASC</p> <p>ACE, Mini-ACE, CBD, CASC</p> <p>CBD, CP, CBGGA</p> <p>ACE, Mini-ACE, CBD, CP, CASC</p> <p>CBD, CP, CBDGA</p> <p>CBD, CP, CASC</p>	<p>1</p>

Be prepared to test out the feasibility and acceptability of decisions	CBD, CP, CASC	
--	---------------	--

Intended learning outcome 4
Based on a comprehensive psychiatric assessment, demonstrate the ability to comprehensively assess and document patient's potential for self-harm or harm to others. This would include an assessment of risk, knowledge of involuntary treatment standards and procedures, the ability to intervene effectively to minimise risk and the ability to implement prevention methods against self-harm and harm to others. This will be displayed whenever appropriate, including in emergencies

1-4a All clinical situations	Assessment methods	GMP Domains
Knowledge Demonstrate knowledge of risk assessment and management	ACE, Mini-ACE, CBD, CP, MCQ, CASC	1
Skills Comprehensively assess immediate and long-term risks to patients and others during assessment and treatment Routinely employ safe, effective and collaborative management plans	ACE, Mini-ACE, CBD, CP, CASC	1
Attitudes demonstrated through behaviours Maintain high standards of professional and ethical behaviour at all times.	ACE, Mini-ACE, CBD, CP, CASC, mini-PAT	1

1-4b Psychiatric emergencies for all specialties	Assessment Methods	GMP Domains
<p>Knowledge</p> <p>Apply the principles of risk assessment and management</p> <p>Shows awareness of child protection issues when addressing psychiatric emergencies. Has basic knowledge of child protection procedures</p> <p>Know the principles underlying management and prevention of violence, hostage taking, self harm, suicide, absconsion, escape and recall of a restricted patient</p> <p>Be familiar with the policy and principles regarding management of seclusion</p>	<p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, CP</p>	<p>1</p>
<p>Skills</p> <p>Resuscitation</p> <p>Be able consistently to assess risk and utilise the full resources of the available Mental Health Services in the management of high risk situations</p> <p>Be competent in making a clinical assessment with regard to potential dangerousness of an individual to themselves or others</p>	<p>DOPS, CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p>	<p>1</p>

Be able to prioritise what information is needed in urgent situations	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Competent in the supervision and management of challenging behaviour and medical complications in relation to the range of clinical conditions presenting as psychiatric emergencies. Shows good judgment in the choice of treatment settings and in referral decisions	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Assess and manage a patient involved in an incident	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Risk assess situations in which incidents may occur or have occurred and institute appropriate management including contingency planning, crisis management and de-escalation techniques	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Short term control of violence including emergency use of medication, rapid tranquillisation, use of restraint and seclusion	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Post event management		
	CBD, CP, MCQ, CASC	
Assess and manage a patient involved in an incident	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Provision of reports and documentation relating to incidents		
	CBD, CP, CASC	
Working with multidisciplinary and multi-agency colleagues to assess and manage		

incidents	CBD, CP, CASC	
Consider the need for emergency supervision support and feedback for staff, victim, other patients, carers as required	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Attitudes demonstrated through behaviours		1
Be able to work under pressure and to retain professional composure and to think clearly when working in emergency situations	ACE, Mini-ACE, CBD, CP, MCQ, CASC, mini-PA	
Be able to prioritise work appropriately when confronted with clinical crises	ACE, Mini-ACE, CBD, CP, CASC, Mini-PAT	
Keep mandatory training up to date	Supervisors' reports	
Maintain professionalism in face of considerable clinical and legal pressure	ACE, Mini-ACE, CBD, CP, CASC, Mini-PAT	
Offer help and support to others (patients, staff and carers)	ACE, Mini-ACE, CBD, CP, CASC	
Provision of appropriate documentation of incidents	CBD, CP	
Follow appropriate policies and procedures	ACE, Mini-ACE, CBD, CP	

1-4c Mental health legislation	Assessment Methods	GMP Domains
Knowledge Demonstrate an understanding of the contemporary mental health legislation and its local implementation with regard to assessment and treatment of patients, including mentally disordered offenders Understand and make appropriate use of the Mental Health Act in relation to capacity and consent	ACE, Mini-ACE, CBD, CP, MCQ, CASC ACE, Mini-ACE, CBD, CP, MCQ, CASC	1
Skills Apply the legislation appropriately at all times, with reference to published codes of practice	ACE, Mini-ACE, CBD, CP, MCQ, CASC	1
Attitudes demonstrated through behaviours Act with compassion at all times Work with attention to the detail of the legislation	ACE, Mini-ACE, CBD, CP, CASC ACE, Mini-ACE, CBD, CP, CASC	1

1-4d Broader legal framework	Assessment methods	GMP Domains
Knowledge Know the legal responsibilities of psychiatrists with regard, for example, to agencies such as the relevant driving authority	ACE, Mini-ACE, CBD, CP, MCQ,	1

	CASC	
Skills		1
Attitudes demonstrated through behaviours		1
Act in accordance with contemporary codes of practice	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Be sensitive to the potential conflict between legal requirements and the wishes of the patient	ACE, Mini-ACE, CBD, CP, MCQ, CASC, CBDGA	

Intended learning outcome 5
Based on the full psychiatric assessment, demonstrate the ability to conduct therapeutic interviews; that is to collect and use clinically relevant material. The doctor will also demonstrate the ability to conduct a range of individual, group and family therapies using standard accepted models and to integrate these psychotherapies into everyday treatment, including biological and socio-cultural interventions

1-5a Psychological therapies	Assessment methods	GMP Domains
Knowledge		1
Apply contemporary knowledge and principles in psychological therapies	CBD, CP, MCQ, CASC, SAPE	
Skills		1
Foster a therapeutic alliance with patients	ACE, Mini-ACE, CBD, CP, CASC, CBDGA	

With appropriate supervision, commence and monitor therapeutic treatment in patients, based on a good understanding of the mechanisms of their actions	CBD, CP, SAPE	
Demonstrate the capacity to deliver basic psychological treatments in at least two modalities of therapy and over both longer and shorter durations	CBD, CP, SAPE	
Attitudes demonstrated through behaviours		1
Respond appropriately to supervision	CBD, CP, SAPE	

Intended learning outcome 6

Demonstrate the ability to concisely, accurately and legibly record appropriate aspects of the clinical assessment and management plan

1-6a Record keeping	Assessment methods	GMP Domains
Knowledge Define the structure, function and legal implications of medical records and medico-legal reports Demonstrate a knowledge of the relevance of contemporary legislation pertaining to patient confidentiality Awareness of issues surrounding copying correspondence to patients	CBD, CP, MCQ, CASC ACE, Mini-ACE, CBD, CP, MCQ, CASC ACE, Mini-ACE, CBD, CP, MCQ, CASC	1

Skills Record concisely, accurately, confidentially, and legibly appropriate elements of the history, examination, investigation, differential diagnosis, risk assessment and management plan	CBD, CP, supervisors report	1
Attitudes demonstrated through behaviours Complete case records and all forms of written clinical information in a consistent, timely and responsible fashion	CBD, CP, supervisors reports	1

MANAGING LONG-TERM PSYCHIATRIC ILLNESS

Intended learning outcome 7

Develop the ability to carry out specialist assessment and treatment of patients with chronic and severe mental disorders and to demonstrate effective management of these disease states

1-7a Management of severe and enduring mental illness	Assessment methods	GMP Domains
Knowledge Define the clinical presentations and natural history of patients with severe and enduring mental illness Define the role of rehabilitation and recovery services Define the concept of recovery	CBD, CP, MCQ, CASC ACE, Mini-ACE, CBD, CP, MCQ, CASC ACE, Mini-ACE, CBD, CP, MCQ,	1

<p>Define the concept of quality of life and how it can be measured</p> <p>Awareness of disability/housing benefits that patients may be entitled to claim</p>	<p>CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p>	
<p>Skills</p> <p>Maintain hope whilst setting long term, realistic goals</p> <p>Develop long-term management plans</p> <p>Act as patient advocate in negotiations with services</p> <p>Demonstrate skills in risk management in chronic psychiatric disorders</p> <p>Demonstrate skills in pathway care management</p>	<p>ACE, Mini-ACE, CBD, CP, CASC</p> <p>ACE, Mini-ACE, CBD, CP, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, CP, CASC</p> <p>ACE, Mini-ACE, CBD, CP, CASC</p> <p>ACE, Mini-ACE, CBD, CP, CASC</p>	1
<p>Attitudes demonstrated through behaviours</p> <p>Treat each patient as an individual</p>	<p>ACE, Mini-ACE, CBD, CP, CASC</p>	1

Demonstrate an appreciation of the effect of chronic disease states on patients and their families	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Develop and sustain supportive relationships with patients with severe and enduring mental illness	ACE, Mini-ACE, CBD, CP, mini-PAT	
Demonstrate an appreciation of the impact of severe and enduring mental illness on patients, their families and carers	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Demonstrate an appreciation of the importance of co-operation and collaboration with primary healthcare services, social care services, and non-statutory services	ACE, Mini-ACE, CBD, CP, MCQ, CASC	

2. COMMUNICATOR

DESCRIPTION: Psychiatrists facilitate effective therapeutic relationships with patients, families and carers. This is essential for effective clinical practice including diagnosis and decision-making. They enable patient-centered therapeutic communication through shared decision making and effective dynamic interactions with patients, families, carers, other professionals and other important individuals. The competencies of this role are essential for establishing rapport and trust, formulating a diagnosis, delivering information, striving for mutual understanding and facilitating a shared plan of care

COMMUNICATION SKILLS

Intended learning outcome 8

Use effective communication with patients, relatives and colleagues. This includes the ability to conduct interviews in a manner that facilitates information gathering and the formation of therapeutic alliances

2-8a Within a consultation	Assessment methods	GMP Domains
Knowledge Demonstrate a knowledge of how to structure the clinical interview to identify the patients concerns and priorities, their expectations and their understanding Demonstrate a knowledge of how and when to telephone a patient at home Be aware of limits of your expertise	ACE, Mini-ACE, CBD, CP, MCQ, CASC ACE, Mini-ACE, CBD, CP, CASC ACE, Mini-ACE, CBD, CP,	3

	CASC	
Skills Demonstrate interviewing skills, including the appropriate initiation of the interview, the establishment of rapport, the appropriate use of open ended and closed questions, techniques for asking difficult questions, the appropriate use of facilitation, empathy, clarification, confrontation, reassurance, silence and summary statements Solicit and acknowledge expression of the patients' ideas, concerns, questions and feelings Understand the ways in which patients may communicate that are not directly verbal and have symbolic or unconscious elements Communicate information to patients in a clear fashion Appropriately close interviews Stay within limits of expertise Communicate both verbally and in writing to patients whose first language may not be English in a manner that they understand Be able to use interpreters and translators appropriately	ACE, Mini-ACE, CASC ACE, Mini-ACE, CASC CBD, CP, CBDGA ACE, Mini-ACE, CASC, mini-PAT ACE, Mini-ACE, CASC ACE, Mini-ACE, CBD, CP, Mini-PAT ACE, mini-ACE, CASC ACE, mini-ACE, CASC	3

<p>Be able to communicate using aids with those who have sensory impairments e.g. deafness</p> <p>Avoid jargon and use familiar language</p> <p>Give clear information and feedback to patients.</p> <p>Share information with relatives and carers when appropriate</p> <p>Use appropriate Information Technology (IT) skills</p>	<p>ACE, mini-ACE, CASC</p> <p>ACE, mini-ACE, CASC</p> <p>ACE, mini-ACE, CASC</p> <p>ACE, mini-ACE, CBD, CP, CASC</p> <p>ACE, mini-ACE, CBD, CASC</p>	
<p>Attitudes demonstrated by behaviours</p> <p>Demonstrate respect, empathy, responsiveness, and concern for patients, their problems and personal characteristics</p> <p>Demonstrate an understanding of the need for involving patients in decisions, offering choices, respecting patients' views</p>	<p>ACE, mini-ACE, CBD, CASC, CBDGA</p> <p>ACE, mini-ACE, CBD, CASC, mini-PAT</p>	<p>3</p>

Ensure that dress and appearance are appropriate to the clinical situation and patients' sensitivity	ACE, Mini-ACE, CASC	
--	---------------------	--

3. COLLABORATOR

DESCRIPTION: Psychiatrists work in collaboration with many other professionals and agencies. They must therefore develop a thorough understanding of health and social care systems and demonstrate this consistently in their daily practice

Intended learning outcome 9
Demonstrate the ability to work effectively with colleagues, including team working

3-9a Clinical teamwork	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of the roles and responsibilities of team members Demonstrate an understanding of the roles of primary healthcare and social services	CBD, CP, Mini-PAT, MCQ CBD, CP, MCQ	3
Skills Communicate and work effectively with team members	CBD, CP, Mini-PAT	3
Attitudes demonstrated through behaviours Show respect for the unique skills, contributions and opinions of others	CBD, CP, Mini-PAT	3

Recognise and value diversity within the clinical team	CBD, CP, Mini-PAT	
Be conscientious and work cooperatively	CBD, CP, Mini-PAT	

4. MANAGER

DESCRIPTION: Psychiatrists are integral participants in healthcare organizations, organizing sustainable practices, making decisions about allocating resources and contributing to the effectiveness of the service

Intended learning outcome 10
Develop appropriate leadership skills

4-10a Effective leadership skills	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of the relationship between clinical responsibility and clinical leadership	CBD, CP, mini-PAT	3
Skills Attitudes demonstrated through behaviours Display enthusiasm, integrity, determination and professional credibility	CBD, mini-PAT, supervisors report	3

TIME MANAGEMENT AND DECISION MAKING

Intended learning outcome 11

Demonstrate the knowledge, skills and behaviours to manage time and problems effectively

4-11a Time management	Assessment methods	GMP Domains
Knowledge Demonstrate a knowledge of which patient or tasks take priority	CBD, CP, mini-PAT, supervisors report	3
Skills Manage time effectively Prioritise tasks, starting with the most important Work increasingly efficiently as clinical skills develop Recognise when to re-prioritise or call for help	Mini-PAT, supervisors report Mini-PAT, supervisors report Mini-PAT, supervisors report Mini-PAT, CBD, supervisors report	3

Attitudes demonstrated through behaviours Have realistic expectations of tasks to be completed Be willing to consult and work as part of a team	Mini-PAT, CBD, supervisors report Mini-PAT, CBD, supervisors report	3

4-11b Communication with colleagues	Assessment methods	GMP Domains
Knowledge Write clinical letters, including summaries and reports Use e-mail, internet and the telephone. Communicate effectively with members of the multi-professional team Demonstrate a knowledge of how and when to telephone colleagues, including	Mini-PAT, CBD, supervisors report Mini-PAT, CBD,superviso rs report Mini-PAT, CBD, supervisors report	3

those in primary care	Mini-PAT, CBD, supervisors report	
Skills		3
Use appropriate language	Mini-PAT, supervisors report	
Select the most appropriate communication methods	Mini-PAT, CBD, supervisors report	
Attitudes demonstrated through behaviours		3
Be prompt and respond courteously and fairly	Mini-PAT, CBD, supervisors report	
Show an appreciation of the importance of timely and effective use of all communication methods, including electronic communication	Mini-PAT, CBD, supervisors report	
Demonstrate awareness of the need for prompt and accurate communication with primary care and other agencies	Mini-PAT, CBD, supervisors report	
Show courtesy towards all members of the Community Mental Health Team and support staff, including medical secretaries and clerical staff	Mini-PAT, CBD, supervisors report	

	Mini-PAT, CBD, supervisors report	
4-11c Decision making	Assessment methods	GMP Domains
Knowledge Demonstrate a good understanding of clinical priorities	Mini-PAT, CBD, CP, supervisors report	3
Skills Analyse and manage clinical problems	Mini-PAT, CBD, CP, supervisors report	3
Attitudes demonstrated through behaviours Be flexible and willing to change in the light of changing conditions Be willing to ask for help	Mini-PAT, CBD, supervisors report Mini-PAT, CBD, supervisors report	3

4-11d Continuity of care	Assessment methods	GMP Domains
Knowledge <p>Demonstrate an understanding of the relevance of continuity of care</p> <p>Demonstrate understanding of policy and procedure relating to out-of-hours (eg on-call) working</p>	<p>Mini-PAT, CBD, CP, supervisors report</p> <p>Mini-PAT, supervisors report</p>	3
Skills <p>Ensure satisfactory completion of reasonable tasks at the end of the shift/day with appropriate handover</p> <p>Make adequate arrangements to cover leave</p> <p>Make appropriate decisions in the best interests of patients when on-call</p>	<p>Mini-PAT, supervisors report</p> <p>Mini-PAT, supervisors report</p> <p>Mini-PAT, CBD, supervisors report</p>	3
Attitudes demonstrated through behaviours <p>Recognise the importance of punctuality and attention to detail</p>	<p>Mini-PAT, CBD,</p>	3

<p>Show flexibility for cover of clinical colleagues</p> <p>Respond appropriately to requests when on-call</p>	<p>supervisors report</p> <p>Mini-PAT, supervisors report</p> <p>Mini-PAT, CBD, supervisors report</p>	
--	--	--

4-11e Complaints	Assessment methods	GMP Domains
<p>Knowledge</p> <p>Show awareness of local complaints procedures</p> <p>Show awareness of the systems of independent review in the National Health Service</p>	<p>Mini-PAT, CBD, CP, supervisors report</p> <p>Mini-PAT, CBD, CP, supervisors report, MCQ</p>	3
<p>Skills</p> <p>Appropriately manage dissatisfied patients, relatives and carers and anticipate potential problems</p>	<p>Mini-PAT, CBD, CP,</p>	3

	CBDGA, supervisors report	
Attitudes demonstrated through behaviours		3
Act with honesty and sensitivity	Mini-PAT, CBD, supervisors report	
Be prepared to apologise if appropriate and accept responsibility	Mini-PAT, CBD, supervisors report	
Act in a prompt and decisive fashion	Mini-PAT, CBD, supervisors report	

Intended learning outcome 12

Develop the ability to conduct and complete audit in clinical practice

4-12a Audit	Assessment methods	GMP Domains
Knowledge		2
Demonstrate an understanding of the importance of audit and its place within the framework of clinical governance	Supervisors report, MCQ	

Demonstrate an understanding of the audit cycle	Supervisors report, MCQ	
Demonstrate an understanding of the differences between audit, surveys and research	Supervisors report, MCQ	
Skills		2
Identify relevant topics and appropriate standards	Supervisors report, MCQ	
Implement findings and reassess	Supervisors report, MCQ	
Able to effectively apply audit principles to own work, to team practice and in a service wide context	Supervisors report, MCQ	
Able to undertake and present an audit	Supervisors report, MCQ	
Attitudes demonstrated through behaviours		2
Hold a positive attitude to the potential of audit in evaluating and improving the quality of care	Supervisors report, MCQ	
Show willingness to respect audit findings and adapt practise appropriately	Supervisors report, MCQ	

CLINICAL GOVERNANCE

Intended learning outcome 13

To develop an understanding of the implementation of clinical governance

4-13a Organisational framework for clinical governance and the benefits that patients may expect	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of the component parts of clinical governance Show awareness of the advantages and disadvantages of clinical guidelines Show an appreciation of the importance of reporting serious and untoward incidents	Supervisors report, MCQ Supervisors report, MCQ Supervisors report, MCQ	2
Skills Actively participate in a programme of clinical governance Aim for clinical effectiveness and best practice at all times	Supervisors report, Mini-PAT Supervisors report, Mini-PAT	2

Attitudes demonstrated through behaviours		2
Prepared to learn from mistakes and complaints	Supervisors report, MCQ	
Receptive to the scrutiny of peers and colleagues	Supervisors report, Mini-PAT	
Demonstrate ability to consciously deviate from pathways when clinically indicated	Supervisors report, CBD, Mini-PAT	

5. Health Advocate

DESCRIPTION: In addition to delivering excellent patient care psychiatrists are committed to promoting public understanding of mental health issues and social inclusion

Intended learning outcome 14		
<i>To ensure that the doctor is able to inform and educate patients effectively</i>		
5-14a Educating patients about illness and its treatment	Assessment Methods	GMP Domains
Knowledge		4
Understand the impact of stigmatisation – relating to both mental and physical illness – and its impact on the care of patients	ACE, Mini-ACE, CBD, CP,	

<p>Develop an awareness of how established practices may perpetuate and reinforce stigma</p> <p>Be aware of strategies to enhance patient understanding and potential self-management</p> <p>Demonstrate awareness of methods to improve treatment concordance</p>	<p>MCQ, CASC</p> <p>CBD, CP, MCQ</p> <p>ACE, Mini-ACE, CBD, MCQ, CASC</p> <p>ACE, Mini-ACE, CBD, MCQ, CASC</p>	
<p>Skills</p> <p>Negotiate individual treatment plans including relapse prevention plans</p> <p>Advise patients accurately and sensitively</p>	<p>ACE, Mini-ACE, CBD, MCQ, CASC</p>	4
<p>Attitudes demonstrated through behaviours</p> <p>Appreciate differing perspectives and beliefs with regard to illness</p>	<p>ACE, Mini-ACE, CBD, MCQ, CASC</p>	4

5-14b Environmental and lifestyle factors	Assessment methods	GMP Domains
<p>Knowledge</p> <p>Demonstrate an understanding of factors that influence the aetiology and course of mental disorder, including social deprivation</p>	<p>ACE, Mini-ACE, CBD, MCQ, CASC</p>	4
<p>Skills</p>	<p>ACE, Mini-</p>	4

Advise on environmental and lifestyle changes	ACE, CBD, CASC	
Work with other health and social care workers	CBD, CP, Mini-PAT, CASC	
Attitudes demonstrated through behaviours		4
Be aware of potential personal prejudices	CBD, CP, Mini-PAT, CBDGA	

5-14c Substance misuse	Assessment methods	GMP Domains
Knowledge		4
Demonstrate an understanding of the effects of alcohol and illicit drugs on health and psychosocial wellbeing	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Be aware of the link between risk and substance misuse	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Demonstrate an understanding of support services and agencies	ACE, Mini-ACE, CBD, CP, MCQ, CASC	

Demonstrate an understanding of legislation with regard to illicit drugs	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Demonstrate an understanding of the role of specialist drug and alcohol teams	ACE, Mini-ACE, CBD, CP, MCQ, CASC	
Skills		4
Offer advice on the effects of alcohol and illicit drugs on health and psychosocial wellbeing	ACE, Mini-ACE, CBD, CASC	
Work with other agencies, including those in the non-statutory sector	ACE, Mini-ACE, CBD, MCQ, CASC	
Attitudes demonstrated through behaviours		4
Provide non-judgmental help and support	ACE, Mini-ACE, CBD, CP, CASC	

6. Scholar

DESCRIPTION: Psychiatrists engage in a lifelong pursuit of mastering their domain of expertise. As learners, they recognize the need for Continuing Professional Development and model and facilitate this for others. Through their scholarly activities, they contribute to the creation, dissemination, application and translation of medical knowledge. As teachers, they facilitate and contribute to the education of students, patients, colleagues and others

TEACHING AND EDUCATIONAL SUPERVISION

Intended learning outcome 15

To develop the ability to teach, assess and appraise

6-15a The skills, attitudes, behaviours and practices of a competent teacher	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of the basic principles of adult learning	AoT, supervisors report, Mini-PAT	1
Skills Identify learning outcomes	AoT, supervisors report, Mini-PAT	1
Attitudes demonstrated through behaviours		1

Demonstrate a professional attitude to teaching	AoT, supervisors report, Mini- PAT	
Ensure that feedback from teaching activities is used to develop (and if necessary change) teaching style	AoT, supervisors report, Mini- PAT	

6-15b	Assessment	Assessment methods	GMP Domains
Knowledge			1
Demonstrate a knowledge of the principles of assessment	supervisors report, Mini- PAT		
Demonstrate an understanding of the use of different assessment methods	supervisors report, Mini- PAT		
Demonstrate an understanding of the difference between formative and summative assessment	supervisors report, Mini- PAT		
Skills			1
Attitudes demonstrated through behaviours			1
Be at all times honest when assessing performance	supervisors report, Mini-		

	PAT	
6-15c Appraisal	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of the principles of appraisal (including the difference between appraisal and assessment)	Supervisors report, Mini-PAT	1
Skills		1
Attitude demonstrated through behaviours		1

RESEARCH AND AUDIT

Intended learning outcome 16
<i>To develop an understanding of research methodology and critical appraisal of the research literature</i>

6-16a Research techniques	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of basic research methodology including both quantitative and qualitative techniques	JCP, MCQ	1
Skills		1
Attitudes demonstrated through behaviours		1

6-16b Evaluation and critical appraisal of research	Assessment methods	GMP Domains
Knowledge		1

Demonstrate an understanding of the principles of critical appraisal	JCP, MCQ	
Demonstrate an understanding of the principles of evidence-based medicine, including the educational prescription	JCP, MCQ	
Demonstrate knowledge of how to search the literature using a variety of databases	JCP, MCQ	
Skills		1
Formulate relevant questions from your clinical practice and answer them from the best available evidence	JCP, MCQ	
Assess the importance of findings, using appropriate statistical analysis	JCP, MCQ	
Attitudes demonstrated through behaviours		1
Strive to base your practice on best evidence	CBD, CP, supervisors report	

7. Professional

DESCRIPTION: The social contract between psychiatrists, patients and society requires that all of the above are brought together through contemporary best practice, high ethical standards and exemplary personal behaviours

MAINTAINING TRUST

Intended learning outcome 17

To ensure that the doctor acts in a professional manner at all times

7-17a Doctor patient relationship	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of all aspects of professional relationships including the power differential between psychiatrists and patients Demonstrate an understanding of the boundaries surrounding consultation Demonstrate an understanding of the rights of patients, carers and the public Demonstrate an understanding of the factors involved when the doctor-patient relationship ends	CBD, CP, mini-PAT CBD, CP, mini-PAT, SAPE CBD, CP CBD, CP, SAPE	4
Skills Develop therapeutic relationships that facilitate effective care Deal with behaviour that falls outside the boundary of the doctor/patient relationship Demonstrate the management of ending professional relationships with patients using clear and appropriate communications	CBD, CP, SAPE CBD, CP, supervisors report ACE, Mini-ACE, CBD, SAPE	4
Attitudes demonstrated through behaviours Adopt non-discriminatory behaviour to all patients and recognise their individual needs Respect the patient's autonomy to accept or reject advice and treatment	CBD, Mini-PAT, CBDGA ACE, Mini-	4

At all times be open and honest with patients and carers	ACE, CBD, CBDGA	
Ensure that a decision to end a professional relationship with a patient is fair and does not contravene guidance	ACE, Mini-ACE, CBD, Mini-PAT	
	ACE, Mini-ACE, CBD, SAPE	

7-17b Confidentiality	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of contemporary legislation and practice in relation to patient confidentiality	ACE, Mini-ACE, CBD, CP, Mini-PAT, MCQ	4
Skills Use and share patient information appropriately Demonstrate a capacity to limit information sharing appropriately without either undue restriction or disclosure	CBD, CP, mini-PAT, CASC CBD, supervisors report, Mini-PAT, CASC	4

Attitudes demonstrated through behaviours Respect the rights and limitations of patient confidentiality	ACE, Mini- ACE, CBD, CP, CASC	4
7-17c Consent	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of the components of informed consent, including suggestibility Demonstrate an understanding of the basis of capacity Demonstrate an understanding of the legal framework for capacity (e.g. Mental Capacity Act)	ACE, Mini- ACE, CBD, MCQ, CASC ACE, Mini- ACE, CBD, MCQ, CASC ACE, Mini- ACE, CBD, MCQ, CASC	4
Skills Give appropriate information in a manner which patients are able to understand, adapting techniques and materials according to need		4
Attitudes demonstrated through behaviours Continually respect the individual and fluid nature of consent		4
7-17d Risk management	Assessment methods	GMP Domains

Knowledge		4
Demonstrate a knowledge of risk assessment and management		
Skills		4
Balance risks and benefits with patients, others and wider society		
Attitudes demonstrated through behaviours		4

7-17e Recognise own limitations	Assessment methods	GMP Domains
Knowledge		4
Demonstrate an appreciation of the extent of one's own limitations and when to ask for advice	ACE, Mini-ACE, CBD, Mini-PAT	
Recognise the potential benefits of seeking second opinions in advance of problems arising	ACE, Mini-ACE, CBD, Mini-PAT	
Skills		4
Attitudes demonstrated through behaviours		4
Be willing to consult and admit mistakes	ACE, Mini-ACE, CBD, Mini-PAT	
Be prepared to accept clinical and professional supervision	ACE, Mini-ACE, CBD, Mini-PAT, supervisors report	

7-17f Probity	Assessment methods	GMP Domains
Knowledge Demonstrate understanding of professionally prescribed codes of ethical conduct and practice	CBD, CP, CBDGA, mini-PAT	4
Skills		4
Attitudes demonstrated through behaviours Behave at all times in accordance with contemporary standards of professional practice Demonstrate probity in relationships with pharmaceutical representatives and companies	CBDGA, mini-PAT, supervisors report Mini-PAT, supervisors report	4

7-17g Personal health	Assessment methods	GMP Domains
Knowledge Demonstrate an understanding of and compliance with, the doctor's responsibilities to patients and the public Demonstrate an understanding of occupational health services and support facilities for doctors	Supervisors report, MCQ Supervisors report, MCQ	4
Skills Recognise when to obtain advice and treatment for personal mental and physical	Supervisors	4

health problems	report, MCQ	
Develop appropriate coping mechanisms for stress and be able to seek help if appropriate	Supervisors report, Mini-PAT	
Attitudes demonstrated through Behaviours		4
Recognise personal health as an important issue	Supervisors report, MCQ	
Recognise the manifestations of stress on self	Supervisors report, CBDGA	

MAINTAINING GOOD MEDICAL PRACTICE

Intended learning outcome 18

To develop the habits of lifelong learning

7-18a Maintaining good medical practice	Assessment methods	GMP Domain
Knowledge		4
Maintain and use systems to update knowledge and its application to any aspect of your professional practice; keep up to date with clinical advances and legislation concerning patient care; the rights of patients and their relatives and carers; and research	Supervisors report, MCQ	

Maintain a system in order to keep abreast of major clinical and research developments	Supervisors report, JCP	
Skills		4
Attitudes demonstrated through Behaviours		4
Share evidence in a way to facilitate modifying practice based on new evidence	Supervisors report, JCP	
Share evidence with the wider team to facilitate modification of practice		

7-18b Lifelong learning	Assessment methods	GMP Domains
Knowledge Define and explain the rationale of 'continuing professional development'	Supervisors report	4
Demonstrate an understanding of the concept of a personal development plan	Supervisors report	
Skills Recognise and use learning opportunities, reflect, appraise and, if necessary, change practice	Supervisors report	4
Attitudes demonstrated through Behaviours Be at all times self-motivated and eager to learn Show a willingness to accept criticism and to learn from colleagues	Supervisors report Mini-PAT Supervisors report, Mini-PAT	4

7-18c	Relevance of outside bodies	Assessment methods	GMP Domains
Knowledge	Demonstrate an understanding of the relevance of professional regulatory bodies and specialist societies including the General Medical Council (GMC) and the Medical Royal Colleges	Supervisors report, MCQ	4
Skills	Recognise situations in which it may be appropriate to involve these bodies	Supervisors report, CBD	4
Attitudes demonstrated through Behaviours	Accept the responsibilities of professional regulation	Supervisors report	4

ADVANCED TRAINING IN FORENSIC PSYCHIATRY

Having completed Core Training, the practitioner may enter Advanced Training in their chosen psychiatric specialty. The outcome of this training will be an autonomous practitioner able to work at Consultant level. This Curriculum outlines the competencies the practitioner must develop and demonstrate before they may be certificated as a Specialist in Forensic Psychiatry. Because this level of clinical practice often involves working in complex and ambiguous situations, we have deliberately written the relevant competencies as broad statements. We have also made reference to the need for psychiatrists in Advanced Training to develop skills of clinical supervision and for simplicity, rather than repeat them for each component in the Good Clinical Care Domain; we have stated them only once, although they apply to each domain and will also apply to all specialties and sub-specialties.

The Advanced Training Curriculum builds on Core Psychiatry Training in two ways.

Firstly, Specialty Registrars in Psychiatry all continue to achieve the competencies set out in the Core Psychiatry Training throughout training, irrespective of their psychiatric specialty. This involves both acquiring new competencies, particularly in aspects such as leadership, management, teaching, appraising and developing core competencies such as examination and diagnosis to a high level and, as an expert, serving as a teacher and role model.

Secondly, the Advanced Curriculum set out those competencies that are a particular feature of this specialty. These include competencies that are specific to the specialty, or that feature more prominently in the specialty than they do elsewhere, or that need to be developed to a particularly high level (mastery level) in specialty practice

Some of the intended learning outcomes set out in the Core Curriculum are not included in this Advanced Curriculum. However, for consistency, the numbering system for the intended learning outcomes has been left unchanged here. Therefore, there are gaps in the sequence below.

THE INTENDED LEARNING OUTCOMES FOR SPECIALIST TRAINING IN FORENSIC PSYCHIATRY

Intended learning outcome 1

The doctor will be able to perform specialist assessment of patients and document relevant history and examination on culturally diverse patients to include:

- **Presenting or main complaint**
- **History of present illness**
- **Past medical and psychiatric history**
- **Systemic review**
- **Family history**
- **Socio-cultural history of individual and cultural group**
- **Developmental history**

Intended learning outcome 2

The doctor will demonstrate the ability to construct formulations of patients' problems that include appropriate differential diagnoses, liaising with other specialists and making appropriate referrals

Intended learning outcome 3

The doctor will demonstrate the ability to recommend relevant investigation and treatment in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological, socio-cultural and psychological investigations and then to construct a comprehensive treatment plan addressing biological, psychological and socio-cultural domains

Intended learning outcome 4

Based on a comprehensive psychiatric assessment, demonstrate the ability to comprehensively assess and document patient's potential for self-harm or harm to others. This would include an assessment of risk, knowledge of involuntary treatment standards and procedures, the ability to

intervene effectively to minimise risk and the ability to implement prevention methods against self-harm and harm to others. This will be displayed whenever appropriate, including in emergencies

Intended learning outcome 5

Based on the full psychiatric assessment, demonstrate the ability to conduct therapeutic interviews; that is to collect and use clinically relevant material. The doctor will also demonstrate the ability to conduct a range of individual, group and family therapies using standard accepted models and to integrate these psychotherapies into everyday treatment, including biological and socio-cultural interventions

Intended learning outcome 7

Develop the ability to carry out specialist assessment and treatment of patients with chronic and severe mental disorders and to demonstrate effective management of these disease states

Intended learning outcome 8

Demonstrate effective communication with patients, relatives and colleagues. This includes the ability of the doctor to conduct interviews in a manner that facilitates information gathering and the formation of therapeutic alliances

Intended learning outcome 9

To demonstrate the ability to work effectively with colleagues, including team working

Intended learning outcome 10

Develop appropriate leadership skills

Intended learning outcome 11

Demonstrate the knowledge, skills and behaviours to manage time and problems effectively

Intended learning outcome 12

To develop the ability to conduct and complete audit in clinical practice

Intended learning outcome 13
To develop an understanding of the implementation of clinical governance

Intended learning outcome 15
To develop the ability to teach, assess and appraise

Intended learning outcome 16
To develop an understanding of research methodology and critical appraisal of the research literature

Intended learning outcome 17

Intended learning outcome 1
The doctor will be able to perform specialist assessment of patients and document relevant history and examination on culturally diverse patients to include: <ul style="list-style-type: none"> • Presenting or main complaint • History of present illness • Past medical and psychiatric history • Systemic review • Family history • Socio-cultural history • Developmental history

Intended Learning outcome 1	Assessment methods	GMP Domains
Knowledge Demonstrate a knowledge of the principles of clinical supervision and their practical application (NB this competency applies across all the intended learning outcomes and subjects of this domain)	Mini-PAT, CBD, DONCS	1, 2

Can describe the links between psychopathology, victimisation, mental disorder, behaviour and crime	CP, CBD	
Can outline the criminology of offences relevant to forensic psychiatry and diversity	CP CBD	
Can list the services for special groups of forensic patients	CP, CBD	
Can outline safety policies and procedures relating to patient consultation	ACE, Mini-ACE, CP, CBD	
Skills		1
Tailor history to setting and context	ACE, Mini-ACE, CBD	
Appropriately obtain and document patient informed consent	ACE, Mini-ACE, CBD	
Offer psychiatric expertise to other practitioners to enhance the value of clinical assessments (e.g. through clinical supervision) to which the psychiatrist has not directly contributed	Mini-PAT, CBD, DONCS	
Elicit information required for each component of a psychiatric history; in situations of urgency, prioritise what is immediately needed; and gather this information in difficult or complicated situations	ACE, Mini-ACE, CBD	
Attitudes demonstrated through behaviours		1
Display willingness and availability to give clinical supervision to colleagues at all times (NB this competency applies across all the intended learning outcomes and subjects of this domain)	CBD, DONCS, Mini-PAT	

1-1b Patient examination, including mental state examination and physical examination	Assessment methods	GMP Domains
Knowledge		1
Skills Skillfully tailors the examination to the purpose, setting and context Assessment of safety of environment for patient consultation and examination By the completion of training, psychiatrists will be able to identify psychopathology in all clinical situations, including those that are urgent and/or complex Able to skillfully assess and diagnose patients with multiple and complicated pathologies Able to elicit psychopathology and phenomenology relating to risk	ACE, Mini-ACE, CBD ACE, Mini-ACE, CBD ACE, Mini-ACE, CBD ACE, Mini-ACE, CBD ACE, Mini-ACE, CBD	1
Attitudes demonstrated through behaviours Display an awareness of complex needs Undertake mental state and physical examination and investigations sensitively in accordance with patients diversity needs	ACE, Mini-ACE, CBD, Mini-PAT ACE, Mini-ACE, CBD, Mini-PAT	1

Intended learning outcome 2

The doctor will demonstrate the ability to construct formulations of patients' problems that include appropriate differential diagnoses, liaising with other specialists and making appropriate referrals

Intended learning outcome 2	Assessment methods	GMP Domains
1.2a Diagnosis		
Knowledge Develop an awareness of the impact of legal context on patient evaluation	ACE, Mini-ACE, CBD, CP, Mini-PAT	1
Skills Can perform an assessment of the behavioural abnormalities which increase risk	ACE, Mini-ACE, CBD, CP supervisors report	1
Attitudes demonstrated through behaviours		1

1.2b Formulation	Assessment methods	GMP Domains
Knowledge Understand the balance between the primary duty of care to patients and protecting public safety and take proper account of this in professional decision-making Understands the philosophy of retribution, incapacitation, deterrence	ACE, CBD, CP, supervisors report ACE, CBD, CP,	1

	supervisors report	
Skills Ability to collate and integrate of information from clinical, risk and legal evaluation into a detailed formulation Ability to develop a psychodynamic formulation	CBD, CP, supervisors report CBD, CP, supervisors report	1
Attitudes demonstrated through behaviours Recognising the contribution of MDT members and other agencies in assessing patients, incorporating patient perspective	CBD, CP, Mini-PAT, supervisors report	1

Intended learning outcome 3

The doctor will demonstrate the ability to recommend relevant investigation and treatment in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological and psychological investigations and then to construct a comprehensive treatment plan addressing biological, psychological and socio-cultural domains

1.3b Investigation	Assessment methods	GMP Domains
Knowledge Can describe the appropriate use of actuarial instruments relevant to forensic practice	ACE, Mini-ACE, CBD, CP	1

Skills		1
Elicit a full mental state examination and undertake relevant investigations from a forensic patient across a variety of settings	ACE, Mini-ACE, CBD, CP	
Undertake appropriate investigation in forensic settings	ACE, Mini-ACE, CBD, CP	
Attitudes demonstrated through behaviours		1

1.3c Treatment planning	Assessment methods	GMP Domains
Knowledge		1
Can describe the policies and procedures relating to the care programme approach and effective care coordination	CBD, CP, Supervisors report	
Able to apply legislation relating to interagency working e.g. MAPPA framework, child protection	CBD, CP, Supervisors report	
Can describe the roles and responsibilities of other agencies, such as police, social work probation and the prison service	CBD, CP, supervisors report	
Can outline the statutory care requirements of detained and restricted patients and the role of the RMO	CBD, CP, supervisors report	
Is aware of the impact of secure institutions	CBD, CP, supervisors report	
Skills		1
Has competence in the management of violence	Mini-ACE, ACE,	

Can direct the therapeutic use of security to meet patients needs	CBD, CP	
Is able to utilise relational, procedural and physical aspects of security to manage patients	Mini-ACE, ACE, CBD, CP	
Mitigate against the negative effects of institutionalisation on patient rehabilitation	Mini-ACE, ACE, CBD, CP	
Contribute to psychological understanding of the patient in the context of secure psychiatric institutions	Mini-ACE, ACE, CBD, CP	
Ability to work therapeutically in non clinical settings (prisons, police stations, courts etc)	Mini-ACE, ACE, SAPE, CBD, CP	
Seeking and responding to legal advice	CBD, CP, DONCS	
Multi-agency working	CBD, CP, DONCS	
Management of patients in least restrictive setting	CBD, CP, supervisors report	
Attitudes demonstrated by behaviours		1
Use full range of management strategies including seclusion, de- escalation, breakaway and care and restraint	CBD, CP, supervisors report	

Intended learning outcome 4

Based on a comprehensive psychiatric assessment, demonstrate the ability to comprehensively assess and document patient's potential for self-harm or harm to others. This would include an assessment of risk, knowledge of involuntary treatment standards and procedures, the ability to intervene effectively to minimise risk and the ability to implement prevention methods against self-harm and harm to others. This will be displayed whenever appropriate, including in emergencies

1.4a All clinical situations	Assessment methods	GMP Domains
Knowledge Risk assessment methods and implications of use in forensic settings	CBD, CP, supervisors report	1
Skills Undertake detailed risk assessment Assess and manage a patient at risk in conjunction with multidisciplinary team Formulate detailed risk management plan arising from risk assessment with multidisciplinary team Implementation of risk management plan with multidisciplinary team	CBD, CP, Mini-PAT, supervisors report CBD, CP, Mini-PAT, supervisors report CBD, CP, Mini-PAT, supervisors report CBD, CP, Mini-PAT, supervisors report	1

Attitudes demonstrated through behaviours		1
--	--	----------

1-4b Psychiatric emergencies for all specialties	Assessment methods	GMP Domains
Knowledge Principles underlying management and prevention of violence, hostage taking, self harm, suicide, absconsion, escape and recall of a restricted patient Policy and principles regarding management of seclusion		1
Skills Independently assess and manage patients with mental illnesses including uncommon conditions, in emergencies Demonstrate expertise in applying the principles of crisis intervention in emergency situations Make care plans in urgent situations where information may be incomplete Risk assess situations in which incidents may occur or have occurred and institute appropriate management including contingency planning, crisis management and de-escalation techniques Breakaway techniques maintained and up to date Short term control of violence including emergency use of medication, rapid tranquillisation, use of restraint and seclusion	CBD, CP, Mini-PAT, supervisors report CBD, CP, Mini-PAT, supervisors report CBD, CP, Mini-PAT, supervisors report CBD, CP, supervisors report Supervisors report CBD, CP, supervisors report	1

Post event management	CBD, CP, supervisors report, DONCS	
Assess and manage a patient involved in an incident	ACE, Mini-ACE, CBD, CP	
Provision of reports and documentation relating to incidents	CBD, DONCS, supervisors report	
Working with multidisciplinary and multi-agency colleagues to assess and manage incidents	CBD, DONCS, supervisors report	
Consider the need for emergency supervision support and feedback for staff, victim, other patients, carers as required	CBD, CP, DONCS	
Resuscitation	DOPS, supervisors report	
Attitudes demonstrated through behaviours		1
Maintain good professional attitudes and behaviour when responding to situations of ambiguity and uncertainty	CBD, CP, Mini-PAT, supervisors report	
Keep mandatory training up to date	Supervisors report	
Ability to maintain professionalism in face of considerable clinical and legal pressure	CBD, CP, Mini-PAT, supervisors report	
Offer help and support to others (patients, staff and carers)	CBD, CP, DONCS, supervisors report	

Provision of appropriate documentation of incidents Follow appropriate policies and procedures	CBD, DONCS, supervisors report CBD, DONCS, supervisors report	
---	--	--

1-4c Mental health legislation	Assessment methods	GMP Domains
<p>Knowledge</p> <p>Demonstrate practical knowledge of the relevant mental health legislation, guidelines, local policies, procedures, codes of practice and guidance relating to: mental health, capacity, confidentiality, data protection, freedom of information, disability and discrimination, consent, bullying and harassment, human rights, public protection</p> <p>Criminal, civil and case law relating to forensic patients</p> <p>Other legislation relating to patient care in forensic settings</p>	<p>CBD, CP, DONCS, supervisors report</p> <p>CBD, CP, DONCS, supervisors report</p> <p>CBD, CP, DONCS, supervisors report</p>	<p>1</p>
<p>Skills</p> <p>Demonstrate the competent assessment of a patient using relevant mental health legislation both in emergency and routine practice</p> <p>Be able to give testimony at an appropriately convened tribunal to review the detention of a compulsory patient</p> <p>Be able to apply knowledge to forensic practice</p> <p>Application to services and to patient care</p>	<p>CBD, ACE, Mini-ACE,</p> <p>CBD, DONCS</p> <p>CBD, DONCS, ACE, Mini-ACE, supervisors report</p> <p>CBD, DONCS, ACE, Mini-ACE, supervisors report</p>	<p>1</p>

<p>Attitudes demonstrated through behaviours</p> <p>Contribute to multidisciplinary team care of patients within relevant legal framework</p> <p>Contribution to patients management during legal proceedings</p> <p>Demonstrate an understanding of need to balance rights and responsibilities, welfare and public protection</p> <p>Recognise duty to patients, carers and public safety Always work within appropriate practice guidelines for the use of mental health legislation</p> <p>Be prepared to give advice to others on the use of mental health and allied legislation</p>	<p>CBD, CP, DONCS, Mini-PAT, supervisors report</p> <p>CBD, DONCS, ACE, supervisors report</p> <p>CBD, DONCS, CP, supervisors report</p> <p>CBD, DONCS, CP, supervisors report</p> <p>CBD, DONCS, Mini-PAT, supervisors report</p>	<p>1</p>
---	--	-----------------

1-4d Broader legal framework	Assessment methods	GMP Domains
<p>Knowledge</p> <p>Demonstrate awareness of specialist aspects of the law</p> <p>Purpose to which reports could be put and secondary uses</p>	<p>CBD, CP, DONCS, Mini-PAT, supervisors report</p> <p>CBD, CP, DONCS, supervisors report</p>	<p>1</p>

Role of expert, professional witness and witness of fact	CBD, CP, DONCS, supervisors report	
Practical matters in preparing report	CBD, CP, DONCS, supervisors report	
Criminal/ civil legal issues to be considered	CBD, CP, DONCS, supervisors report	
General principles of report writing avoiding medical jargon	CBD, CP, DONCS, supervisors report	
Familiar with court procedures, both in Criminal and civil proceedings	CBD, CP, DONCS, supervisors report	
Skills Prepare reports for Mental Health Review Tribunals, managers' hearings, Courts of Law (coroners, criminal and civil) other practitioners, criminal justice agencies	CBD, CP, DONCS, supervisors report	1
Interpret legislation and explain the implications in jargon free language at a level for the specific situation	DONCS, supervisors report	
Receive and negotiate instructions to prepare reports	DONCS, supervisors report	
Develop a formulation of a case and write report to a high standard	CBD, supervisors report	
Attitudes demonstrated through behaviours Testify as an expert witness within limits of own expertise	DONCS, supervisors report	1

Intended learning outcome 5

Based on the full psychiatric assessment, demonstrate the ability to conduct therapeutic interviews; that is to collect and use clinically relevant material. The doctor will also demonstrate the ability to conduct a range of individual, group and family therapies using standard accepted models and to integrate these psychotherapies into everyday treatment, including biological and socio-cultural interventions

1-5a Psychological therapies	Assessment methods	GMP Domains
Knowledge Apply contemporary knowledge and principles in psychological therapies Psychotherapeutic management of forensic patients Demonstrate the acquisition of more advanced treatment skills Application of the range of treatment interventions including physical, psychological and social to patients with complex needs The therapeutic use of security Principles and evidence base for treatments	 CBD, CP, SAPE CBD, CP, Mini-PAT, SAPE CBD, CP, SAPE CBD, CP, supervisors report CBD, CP, supervisors report CBD, CP, supervisors report	1
Skills With the MDT deliver evidence based treatment including psychological treatments for forensic patients with complex needs	CBD, CP, mini-PAT	1

Undertake assessments in different settings from community to high security	CBD, CP, ACE, Mini-ACE	
Support the team in delivering psychotherapy appropriate for forensic patients	CBD, CP, DONCS	
Work therapeutically in a variety of non clinical settings within the constraints of those systems to treat patient needs effectively	CBD, CP, SAPE	
Safely manage therapy with forensic patients	CBD, CP, SAPE	
Evaluate the outcome of psychological treatments delivered either by self or others and organise subsequent management appropriately	CBD, CP, Mini-PAT, SAPE	
Explain, initiate, conduct and complete a range of psychological therapies, with appropriate supervision	ACE, Mini-ACE, CBD, Mini-PAT, SAPE	
Display the ability to provide expert advice to other health and social care professionals on psychological treatment and care	CBD, DONCS, Mini-PAT	
Attitudes demonstrated through behaviours		1
Continue to practice and develop a range of treatment skills	Supervisors report, SAPE	

MANAGING LONG-TERM PSYCHIATRIC ILLNESS

Intended learning outcome 7

Develop the ability to carry out specialist assessment and treatment of patients with chronic and severe mental disorders and to demonstrate effective management of these disease states

1-7a Management of severe and enduring mental illness	Assessment methods	GMP Domains
Knowledge Impact of imprisonment on those with mental health disorders Motivational theory and stages of change in treatment Principles and practice regarding social inclusion	CBD, CP CBD, CP, SAPE CBD, CP	1
Skills Develop clinical effectiveness in the treatment and rehabilitation of forensic psychiatry patients with chronic disorders Motivate patients and the team to adhere to the treatment plan and focus on the improvement Treatment and prevention of further victimisation by individuals and the system Demonstrate ability to utilise rehabilitation principles including recovery model to meet patient needs	CBD, CP, supervisors report CBD, CP, DONCS CBD, CP, supervisors report CBD, CP, supervisors report CBD, CP, DONCS	1

Care pathway management	CBD, Mini-PAT, SAPE	
Develop professional alliances with patients over the long-term	CBD, DONCS	
Develop therapeutic optimism and hope		
Assist and guide trainees in assessing and managing patients with severe and enduring mental illness		
Attitudes demonstrated through behaviours		1

Intended learning outcome 8

Demonstrate effective communication with patients, relatives and colleagues. This includes the ability of the doctor to conduct interviews in a manner that facilitates information gathering and the formation of therapeutic alliances

2-8a Within a consultation	Assessment methods	GMP Domains
Knowledge		3
Know the limits of expertise	Mini-PAT, supervisors report	
Theoretical basis of effective communication	CBD, Supervisors report	
How communication failures can occur and adversely affect clinical outcome	CBD, Supervisors report	

Understand the patients' and carers' perspectives	CBD, Supervisors report	
Local complaints procedures	CBD, Supervisors report	
Carers agencies	CBD, Supervisors report	
Role of advocacy services and PALS services	CBD, Supervisors report	
Knowing what can go wrong when ending patient relationships	CBD, Supervisors report	
Confidentiality	CBD, Supervisors report	
Skills		3
Stay within limits of own expertise	ACE Mini-ACE, CBD, supervisors report	
Recognition of different perspectives	ACE Mini-ACE, CBD, supervisors report	
Accurate unbiased synthesis of all relevant information into a coherent logical communication which is understood by the recipient	ACE Mini-ACE, CBD, supervisors report

Skills Provide clinical supervision	Supervisors report, CBD, DONCS	4
Attitudes demonstrated through behaviours		4

METHODS OF LEARNING AND TEACHING

The curriculum is delivered through a number of different learning experiences, of which experiential workplace learning with supervision appropriate to the trainee's level of competence is the key. This will be supported by other learning methods as outlined below: -

1. Appropriately supervised clinical experience
2. Psychotherapy training
3. Emergency psychiatry experience
4. Interview skills
5. Learning in formal situations
6. Teaching
7. Management experience
8. Research
9. ECT Training
10. Special interest sessions

1. Appropriately supervised clinical experience

Trainees must at all times participate in clinical placements that offer appropriate experience i.e. direct contact with and supervised responsibility for patients. **All training placements must include direct clinical care of patients.** Placements based on observation of the work of other professionals are not satisfactory. **Each placement must have a job description and timetable. There should be a description of potential learning objectives in post.** Training placements should not include inappropriate duties (e.g. routine phlebotomy, filing of case notes, escorting patients, finding beds, etc) and must provide a suitable balance between service commitment and training.

In Core Psychiatry Training the Curriculum Outcomes are met by way of a trainee working in a purpose-designed programme. Within the programme each placement should be clearly designated as providing experience in general psychiatry, one of its three recognised sub specialties, or one of the five other recognised specialties. Placements may be of four or six months' duration. Where placements offer a mixture of experience between specialties/sub specialties, the proportion of time spent in each clinical area should be clearly stated. Posts should provide the trainee with the experience and assessments necessary to achieve full coverage of the curriculum. Individual programmes of training provided by Deaneries must be able to meet

contemporary requirements with regard to examination eligibility. Trainees are required to complete the required numbers and types of workplace-based assessment (WPBA) appropriate to their level of training and opportunities for this must be made available within the placements.

The first twelve months of Core Psychiatry Training should normally be in General Psychiatry, or a combination of psychiatry of old age and General Psychiatry. Each individual placement does not necessarily have to include both hospital and community experience but each training scheme must provide an overall balance of hospital and community experience. So that the programme must ensure that the rotation plan for an individual trainee enables them to gain the breadth of experience required. This will require monitoring by the trainee through their portfolio and by the scheme through its operational management processes.

The contribution of specialty/sub-specialty placements to Core Psychiatry Training programmes is as follows: -

General Psychiatry Experience gained in General Psychiatry must include properly supervised in-patient and out-patient management, with both new patients and follow-up cases, and supervised experience of emergencies and 'on call' duties. Training placements will afford experience in hospital and/or community settings. Increasingly training in General Psychiatry will be delivered in functional services that specialise a single area of work such as, crisis, home treatment, early interventions, assertive interventions or recovery models. Thus not all posts will provide all experiences as detailed below. During their rotation a trainee must document experience in all of the below; a trainee may need two or more complimentary placements (e.g. an in-patient placement and a home treatment team placement) to achieve the required breadth of experience: -

- Assessment of psychiatric emergencies referred for admission.
- Assessment and initial treatment of emergency admissions.
- Day to day management of psychiatric inpatients.
- Participation in regular multi-disciplinary case meetings.
- Prescribing of medication and monitoring of side-effects.
- Administration of ECT.
- Use of basic psychological treatments.
- Use of appropriate mental health legislation.
- Assessment of new outpatients.

- Continuing care of longer-term outpatients.
- Psychiatric day hospital.
- CMHT- joint assessments in the community with other professionals.
- Crisis intervention.
- Home treatment.

General psychiatry sub-specialties may offer experience as follows: -

- a) **Substance misuse:** trainees in General Psychiatry should receive appropriate experience in this area. Where a specific service exists for the treatment of alcohol and/or drug dependence it should be possible to offer a whole time or part time placement. For this to be regarded as sub-specialty experience, the trainee must spend at least half their time in the service.
- b) **Liaison psychiatry:** experience in liaison psychiatry may be gained during General Psychiatry training or via a specialist training post. All trainees should receive adequate supervised experience in the assessment and management of deliberate self-harm, psychiatric emergencies in general and surgical wards and the accident and emergency department. Other valuable experience might include training in renal units, pain clinics and intensive care units.
- c) **Rehabilitation:** attachment to a rehabilitation team with particular emphasis on the care of patients with severe chronic disability is recommended. Such experience should involve not only inpatient care but also community facilities including day centres, hostels, supervised lodgings and sheltered workshops.
- d) **Eating disorders, neuropsychiatry and perinatal psychiatry:** as these potential sub-specialties become established, it will be possible to offer whole or part time specialist training posts.

Psychiatry of old age Particular importance is attached to experience in this area because of the increasing numbers of elderly people in the population and the special considerations needed in diagnosis and treatment. The psychiatry of old age should constitute a separate attachment within the rotational training scheme. It is important that trainees gain experience in the acute and chronic functional disorders of older people, in addition to the assessment and management of organic illnesses. This should include both hospital and community experience and an opportunity to work as part of the multidisciplinary team. Experience of pharmacological and non-pharmacological strategies and treatments should be gained, including the drugs used to treat cognitive and behavioural symptoms in dementia.

Forensic psychiatry Some experience may be gained in General Psychiatry but a specialist attachment in forensic psychiatry is recommended. Apart from the experience of the provision of psychiatric care in secure settings it is valuable for trainees to accompany consultants when patients are seen at prisons, hospitals, secure units, remand centres and other establishments. It may be helpful for trainees to prepare shadow court reports for discussion with their consultants. Specific instruction is needed in the principles of forensic psychiatry, detailed risk assessment and management and medico-legal work.

Psychiatry of learning disability There should be sufficient exposure to give the trainee an awareness of the nature and scope of the problems with an emphasis on integrated psychiatric and psychological treatment rather than basic physical care. Trainees must get experience of community facilities as well as hospital care.

Child and adolescent psychiatry Trainees should play an active part in patient care and not be expected to adopt a passive observer role. The experience should include extensive community experience and include both medical and psychological approaches to treatment.

Not all trainees will have the opportunity to have a post in child and adolescent psychiatry during Core Psychiatry Training. Aspects of developmental psychiatry are important for all psychiatric trainees whatever specialty within psychiatry they subsequently choose. Trainees need to understand child development and the influences that can foster this or interfere with it. To do this they need to understand the bio-psycho-social approach and the varying balance of influences at different stages of development. They need to understand both aberrant development and also how normal development can be disrupted. Whilst this is best learned through clinical experience in a developmental psychiatry post (child and adolescent psychiatry or adult learning difficulties), there will be a few trainees who have to gain these skills through in other ways. The knowledge base will come from clinical experience coupled with lectures, seminars and private study including study for examinations. Those who do not get a post in developmental psychiatry are strongly advised to negotiate a clinical attachment during another placement to best prepare them to undertake the child and adolescent WPBA's that they will be expected to achieve during this stage of their training.

All Core Psychiatry Training (CT1-3) trainees are likely to be responsible for seeing young people who present to Accident and Emergency Departments with self-harm whilst they are undertaking out of hours on call duties.

This means that they have to understand safeguarding issues and the assessment of risk for these young people. To ensure that they are supported in this, there are competencies appropriate to CT1-3 in safeguarding (Intended Learning Outcome 2) and Managing Emergencies (Intended Learning Outcome 4). In addition, it has become increasingly clear that developmental disorders such as ADHD and autism can continue into adult life and that they have been under-recognised in adulthood. Competence in recognising these disorders is required for all trainees. Depression is an important illness that often starts in adolescence and this is referred to in the ARCP Guide to Core Psychiatry Training.

The clinical experience in the Advanced Training Programme in Forensic Psychiatry will consist of the equivalent of three years full time experience all of which must be spent in designated forensic psychiatry. Most training is likely to encompass core forensic psychiatric practice and the main training placements will usually be in medium secure settings, with experience of community management of forensic patients, prisons as well as high and low secure placements. During the programme, trainees should have the opportunity to gain experience in the following settings:

- Medium secure unit
- High Secure Hospital
- Forensic in-patient ward ,e.g. locked, open, rehabilitation
- Out-patient clinic (including supervision of Restricted patients)
- Community management of forensic patients
- Penal establishments for remand and sentenced prisoners
- Criminal courts
- Mental Health Review Tribunals
- Court diversion schemes
- Civil courts
- Forensic learning disability units
- Adolescent and child forensic psychiatry services, e.g. secure units
- Victim services
- Specialist penal establishments, i.e. young persons, life-sentenced prisoners, high security, Vulnerable prisoner units, care of females, special units
- Services for the homeless

Trainees should also gain experience by visiting the following settings:

- Home Office
- Parole board
- Other High Secure Hospitals
- Other medium secure units
- Police facilities
- Therapeutic communities
- Privately organised forensic services

It is possible that some of the experiences outlined above will not be available in a trainee's local deanery and therefore they may be required to travel outside the deanery to acquire some of the essential experience and training necessary to attain a CCT, this is particularly so for High Secure hospital experience.

Clinical placements in advanced training in Forensic Psychiatry should last 12 months for a full-time trainee. This gives sufficient time for a realistic clinical experience and allows the completion of treatment programmes and time to build up and close down a clinical service. However, placements of up to 15 months may be acceptable if there are problems with rotational dates. It must be emphasised that advanced training in Forensic Psychiatry is not simply an extension of Core Psychiatry Training and the duties performed by advanced trainees must reflect this. There should not be a routine expectation that the higher trainee continues to work at a level appropriate for Core Psychiatry training. The specialty registrar (ST4-6) works more independently and has a greater supervisory, leadership and managerial role. There must be opportunity for the specialty registrar to develop supervisory skills. The clinical load should not be so heavy so as to jeopardise the research, teaching and managerial functions.

2. Psychotherapy training

The aim of psychotherapy training is to contribute to the training of future consultant psychiatrists in all branches of psychiatry who are psychotherapeutically informed, display advanced emotional literacy and can deliver some psychological treatments and interventions. Such psychiatrists will be able to:

- Account for clinical phenomena in psychological terms
- Deploy advanced communication skills
- Display advanced emotional intelligence in dealings with patients and colleagues and yourself.

- Refer patients appropriately for formal psychotherapies
- Jointly manage patients receiving psychotherapy
- Deliver basic psychotherapeutic treatments and strategies where appropriate

A senior clinician with appropriate training (preferably a consultant psychotherapist) should be responsible for organising psychotherapy training within a School in line with current curriculum requirements. There are two basic requirements: -

Case based discussion groups (CBDG) are a core feature of early training in psychotherapeutic approach to psychiatry. They involve regular weekly meetings of a group of trainees and should last around one and one and a half hours. The task of the meeting is to discuss the clinical work of the trainees from a psychotherapeutic perspective paying particular attention to the emotional and cognitive aspects of assessment and management of psychiatric patients in whatever setting the trainee comes from. Trainees should be encouraged to share their feelings and thoughts openly and not to present their cases in a formal or stilted manner. Most trainees should attend the group for about one year. Attendance and participation in the CBDG will be assessed.

Undertaking specific training experiences treating patients is the only reliable way to acquire skills in delivering psychotherapies. The long case also helps in learning how to deal with difficult or complicated emotional entanglements that grow up between patients and doctors over the longer term. Patients allocated to trainees should be appropriate in terms of level of difficulty and should have been properly assessed. Trainees should be encouraged to treat a number of psychotherapy cases during their training using at least two modalities of treatment and at least two durations of input. This experience must be started in Core training and continued in Advanced Training, so that by the end of Core Training the trainee must have competently completed at least two cases of different durations. The psychotherapy supervisor will assess the trainee's performance by using the SAPE.

Care should be given in the selection of psychological therapy cases in Advanced Training in Forensic Psychiatry to make the experience gained is relevant to the trainee's future practice as a consultant. For example trainees forensic psychiatry may well wish to develop skills in motivation enhancement therapy, while trainees with an interest in personality disorders should consider developing their knowledge of treatments such as dialectical behaviour therapy, mentalisation based therapy and cognitive analytic therapy.

The psychotherapy tutor should have selected supervisors. Psychotherapy supervisors need not be medically qualified but they should possess appropriate skills and qualifications both in the modality of therapy supervised and in teaching and supervision.

3. Emergency Psychiatry

Trainees must gain experience in the assessment and clinical management of psychiatric emergencies and trainees must document both time spent on-call and experience gained (cases seen and managed) and this should be "signed off" by their Clinical Supervisor/Trainer.

A number and range of emergencies will constitute relevant experience. During Core Psychiatry training, trainees must have experience equivalent to participation in a first on call rota with a minimum of 55 nights on call during the period of core specialty training (i.e. at least 50 cases with a range of diagnosed conditions and with first line management plans conceived and implemented.) (Trainees working part time or on partial shift systems must have equivalent experience.)

Where a training scheme has staffing arrangements, such as a liaison psychiatric nursing service, which largely excludes Core Psychiatry trainees from the initial assessment of deliberate self-harm patients or DGH liaison psychiatry consultations, the scheme must make alternative arrangements such that trainees are regularly rostered to obtain this clinical experience under supervision. Such supervised clinical experience should take place at least monthly.

Psychiatric trainees should not provide cross specialty cover for other medical specialties except in exceptional circumstances where otherwise duty rotas would not conform to the European Working Time Directive. No trainee should be expected to work to a level beyond their clinical competence and experience.

Where daytime on call rotas are necessary, participation must not prevent trainees attending fixed training events.

Advanced trainees in Forensic Psychiatry must have opportunities to supervise others as part of their experience of emergency psychiatry. They should not routinely perform duties (such as clerking emergency admissions) that would normally be performed by less experienced practitioners.

4. Interview skills

All trainees must receive teaching in interviewing skills in the first year Core Psychiatry Training (CT1). The use of feedback through role-play and/or video is recommended. Soliciting (where appropriate) the views of patients and carers on performance is also a powerful tool for feedback.

5. Learning in formal situations

Learning in formal situations will include attending a number of courses for which the trainee should be allowed study leave: -

- It is essential that trainees in Core Psychiatry Training attend an MRCPsych course that comprises a systematic course of lectures and /or seminars covering basic sciences and clinical topics, communication and interviewing skills.
- Local postgraduate meetings where trainees can present cases for discussion with other psychiatrists, utilising information technology such as slide presentations and video recordings.
- Journal clubs, where trainees have the opportunity to review a piece of published research, with discussion chaired by a consultant or specialty registrar (ST4-ST6), Postgraduate meetings where trainees can present and discuss audit.
- Multi-disciplinary/multi-professional study groups.
- Learning sets which can stimulate discussion and further learning.
- Trainees must also exercise personal responsibility towards their training and education and are encouraged to attend educational courses run by the College's divisional offices.

6. Experience of teaching

It is important that all trainee psychiatrists have experience in delivering education. In Core Psychiatry training, trainees should have opportunities to assist in 'bedside' teaching of medical students and delivering small group teaching under supervision. Advanced trainees in General Psychiatry should be encouraged to be

involved in teaching CT1-3 trainees on the MRCPsych course and to be involved in the design, delivery and evaluation of teaching events and programmes.

7. Management experience

Opportunity for management experience should be available in all training programmes and should begin with simple tasks in the clinical, teaching and committee work of the hospital or service.

Attending courses and by shadowing a medical manager to get insight into management. For example, the final month of a ST4 placement could be spent working with a manager.

"Hands on" experience is especially effective, e.g. convening a working group, and it may be possible for a trainee to be given a relevant management task to complete.

Opportunity for involvement in administration and collaboration with non medical staff at local level on the ward or unit, at Trust level or on the training scheme itself to gain familiarity with and an understanding of management structure and process as part of a trainee's professional development as a psychiatrist.

8. ECT Training

All Core Psychiatry training programmes must ensure that there is training and supervision in the use of ECT so that trainees become proficient in the prescribing, administration and monitoring of this treatment.

9. Research

Opportunities must be made available for trainees to experience supervised quantitative or qualitative research and a nominated research tutor should be available within the programme to advise trainees on the suitability of projects. In Core Psychiatry training, research may be limited to case reports or a small literature review. In advanced training in General Psychiatry, trainees should have the opportunity to participate in original

10. Special interest sessions

It is educationally desirable that Advanced Trainees in Forensic Psychiatry have the ability to gain additional experiences that may not be available in their clinical placement. Two sessions every week must be devoted during each year from ST4-6 for such personal development, which may be taken in research or to pursue special clinical interests. Special interest sessions are defined as "a clinical or clinically related area of service which cannot be provided within the training post but which is of direct relevance to the prospective career pathway of the trainee". For instance, a special interest session in substance misuse could be of direct relevance

to a forensic trainee. Special interest sessions may also be used for gaining psychotherapy experience that builds upon the experience the trainee had in Core Training. This experience must be appropriately managed, supervised and assessed. The Training Programme Director must prospectively approve the use of special interest time. Special interest and research supervisors must provide reports for the trainee's ARCP as required by the School of Psychiatry.

THE ASSESSMENT SYSTEM FOR CORE PSYCHIATRY TRAINING AND ADVANCED TRAINING IN FORENSIC PSYCHIATRY

Purpose

The Royal College of Psychiatrists Assessment System has been designed to fulfill several purposes:

- Providing evidence that a trainee is a competent and safe practitioner and that they are meeting the standards required by Good Medical Practice
- Creating opportunities for giving formative feedback that a trainee may use to inform their further learning and professional development
- Drive learning in important areas of competency
- Help identify areas in which trainees require additional or targeted training
- Providing evidence that a trainee is progressing satisfactorily by attaining the Curriculum learning outcomes
- Contribute evidence to the Annual Review of Competence Progression (ARCP) at which the summative decisions regarding progress and ultimately the award of the Certificate of Completion of Training (CCT) are made.

Assessment blueprint

The Assessment Blueprint supplement to this Curriculum shows the assessment methods that can possibly be used for each competency. It is not expected that all trainees will be assessed by all possible methods in each competency. The learning needs of individual trainees will determine which competencies they should be assessed in and the number of assessments that need to be performed. The trainee's Educational Supervisor has a vital role in guiding the trainee and ensuring that the trainee's assessments constitute sufficient curriculum coverage.

Assessment methods

The assessment system consists of the following elements: -

(i) Three written papers that comprise a summative assessment of the knowledge base that underpins psychiatric practice. These may be taken in any order as soon as a doctor enters Specialty Training in psychiatry and will need to be completed before the doctor can proceed to the Clinical Examination.

(ii) The Clinical Examination (Clinical Assessment of Skills and Competencies) is a summative assessment of a doctor's competence in the core skills of psychiatric practice. The Clinical Assessment of Skills and Competencies (CASC) is an OSCE type examination consisting of two parts, completed in one day. On passing the CASC, the doctor will be awarded Membership of the Royal College of Psychiatrists (MRCPsych).

Information for candidates about the written and clinical parts of the MRCPsych Examination can be found at www.rcpsych.ac.uk/exams.aspx

Trainees must pass the MRCPsych examination before entering Advanced Training in General Psychiatry.

(iii) Workplace Based Assessment (WPBA) is the assessment of a doctor's performance in those areas of professional practice best tested in the workplace. The assessment of performance by WPBA will continue the process established in the Foundation Programme and will extend throughout Core Psychiatry Training and Advanced Training in General Psychiatry. It must be understood that WPBA's are primarily tools for giving formative feedback and in order to gain the full benefit of this form of assessment, trainees should ensure that their assessments take place at regular intervals throughout the period of training. All trainees must complete at least one case-focused assessment in the first month of each placement in their training programme. A completed WPBA accompanied by an appropriate reflective note written by the trainee and evidence of further development may be taken as evidence that a trainee demonstrates critical self-reflection. Educational supervisors will draw attention to trainees who leave all their assessments to the 'last minute' or who appear satisfied that they have completed the minimum necessary.

An individual WPBA is not a summative assessment, but outcomes from a number of WPBA's will contribute evidence to inform summative decisions.

The WPBA tools currently consist of:

Assessment of Clinical Expertise (ACE) modified from the Clinical Evaluation Exercise (CEX), in which an entire clinical encounter is observed and rated thus providing an assessment of a doctor's ability to assess a complete case

Mini-Assessed Clinical Encounter (mini-ACE) modified from the mini-Clinical Evaluation Exercise (mini-CEX) used in the Foundation Programme, part of a clinical encounter, such as history-taking, is observed and rated.

Case Based Discussion (CBD) is also used in the Foundation Programme and is an assessment made on the basis of a structured discussion of a patient whom the Trainee has recently been involved with and has written in their notes.

Direct Observation of Procedural Skills (DOPS) is also used in the Foundation Programme and is similar to mini-ACE except that the focus is on technical and procedural skills.

Multi-Source Feedback (MSF) is obtained using the Mini Peer **Assessment Tool (mini-PAT)**, which is an assessment made by a cohort of co-workers across the domains of *Good Medical Practice*.

Case Based Discussion Group Assessment (CBDGA) has been developed by the College to provide structured feedback on a trainee's attendance and contribution to case discussion groups (also known as Balint-type groups) in Core Psychiatry Training.

Structured Assessment of Psychotherapy Expertise (SAPE) has been developed by the College to provide evidence of satisfactory completion of a psychotherapy case.

Case Presentation (CP) developed at the College; this is an assessment of a major case presentation, such as a Grand Round, by the Trainee.

Journal Club Presentation (JCP) similar to CP, and also developed at the College, this enables an assessment to be made of a Journal Club presented by the Trainee.

Assessment of Teaching (AoT) has been developed at the College to enable an assessment to be made of planned teaching carried out by the Trainee, which is a requirement of this curriculum.

Direct Observation of non-Clinical Skills (DONCS) has been developed by the College from the Direct Observation of Procedural Skills (DOPS). The DONCS is designed to provide feedback on a doctor's performance of non-clinical skills by observing them chairing a meeting, teaching, supervising others or engaging in another non-clinical procedure.

Further information on WPBA's can be found on the College website via the following link:
<http://www.rcpsych.ac.uk/training/assessmentsonlineinformation.aspx>

For those in Core Training the following table shows the minimum number of each assessment that need to be undertaken. The minimum number has been arrived at in the light of the reliability of each tool, together with an estimate of the numbers that are likely to be needed to ensure a broad coverage of the Curriculum. Many trainees will require more than this minimum, none will require fewer. More detail is given in the guidance to ARCP panels.

WPBA	Minimum number required per year		
	CT1	CT2	CT3
ACE	2	3	3
mini-ACE	4	4	4
CbD	4	4	4
DOPS	*	*	*
mini-PAT	2	2	2
CBDGA	2	-	-

SAPE	-	1	1
CP	1	1	1
JCP	1	1	1
AoT	*	*	*
DONCS	*	*	*

* There is no set number to be completed in Core Psychiatry training; they may be performed as the opportunity arises
 - Not required

WPBA for Advanced Trainees

Doctors in Advanced Training Programmes should participate in at least one or two rounds of multi-source feedback a year and have at least one other WPBA performed a month. It is likely that the CbD will be an important assessment tool for these doctors because this tool permits a deep exploration of a doctor's clinical reasoning. The mini-ACE may be less important for most advanced trainees, except perhaps those engaged in areas of clinical work that they had not encountered in core training. As stated above, the College is developing the DONCS as a means of assessing performance of skills in situations that do not involve direct patient encounters. In time, it is possible that some psychiatric sub-specialty Advanced Training Curricula may introduce novel WPBA tools for specialised areas of work. Detailed information is contained in the Guide to ARCP panels.

Decisions on progress, the ARCP

Section 7 of the **Guide to Postgraduate Specialty Training in the UK** ("**Gold Guide**" available from www.mmc.nhs.uk) describes the **Annual Review of Competence Progression (ARCP)**. The ARCP is a formal process that applies to all Specialty Trainees. In the ARCP a properly constituted panel reviews the evidence of progress to enable the trainee, the postgraduate dean, and employers to document that the competencies required are being gained at an appropriate rate and through appropriate experience.

The panel has two functions: -

1. To consider and prove the adequacy of the trainee's evidence.
2. Provided the documentation is adequate, to make a judgment about the trainee's suitability to progress to the next stage of training or to confirm that training has been satisfactorily completed

The next section is a guide for ARCP panels regarding the evidence that trainees should submit at each year of Core Psychiatry and Advanced Specialty training in Forensic Psychiatry. There are several different types of evidence including WPBA's, supervisor reports, the trainee's learning plan, evidence of reflection, course attendance certificates etc. The evidence may be submitted in a portfolio and in time, this will be done using the College e-portfolio.

Trainees may submit WPBA's that have been completed by any competent healthcare professional who has undergone training in assessment. In a number of cases, we have stipulated that a consultant should complete the assessment. WPBA's in developmental psychiatry (i.e. in children and patients with learning disability) should be performed by a specialist child psychiatrist or learning disability psychiatrist.

The trainee should indicate the evidence that they wish to be considered for each competency. A single piece of evidence may be used to support more than one competency.

Guide for ARCP panels in Core Psychiatry Training

There is no fixed order of posts in CT 2 and 3; so there are many outcomes that may be achieved in either of the years CT2 or 3. The important factor to be recalled is that all the outcomes must be completed by the end of CT3

Intended learning outcome	CT1	CT2	CT3
Be able to perform specialist assessment of patients and document relevant history and examination on culturally diverse patients to include: <ul style="list-style-type: none"> • Presenting or main complaint • History of present illness • Past medical and psychiatric history • Systemic review • Family history • Socio-cultural history • Developmental history 			
	By the end of ST1 the trainee should demonstrate the ability to take a history and perform an examination on an adult patient who has any of the common psychiatric disorders, including affective disorders; anxiety disorders; psychotic disorders; and personality disorders	By the end of CT2, the trainee should demonstrate the ability to independently take a competent history and perform an examination on adult patients who present with a full range of psychiatric disorders including disorders of cognitive impairment; substance misuse disorders; and organic disorders	By the end of CT3, the trainee should demonstrate the ability to take a history and perform an examination of patients with psychiatric disorders who have a learning disability or are children and be able to perform a competent assessment of a patient with medically unexplained symptoms or physical illness and psychiatric disorder
1a Clinical history	ACE conducted with an adult patient not previously known to the trainee	ACE taking a history from a person with cognitive impairment if not completed in CT1 ACE taking a history from a person with a	ACE taking a history from a not previously known patient who is either physically unwell or has medically unexplained symptoms, if not completed in CT2

		substance misuse problem, if not completed in CT1	ACE taking a history from a not previously known child or patient with learning disability, including an interview with parent or carer when appropriate, if not completed in CT2. This assessment must be conducted by an appropriate specialist
1b Patient examination	<p>ACE conducted with an adult patient not previously known to the trainee, to include mental state examination and an appropriate physical examination</p> <p>CBD of a case presentation of a patient the trainee has fully assessed, including a collateral history</p> <p>Mini-ACE's of patients to demonstrate skillful identification of psychopathology</p>	<p>Mini-ACE, including an appropriate physical examination, to recognise and identify the effects of psychotropic medication</p> <p>Mini-ACE of assessment of cognition, if not performed in CT1</p> <p>Mini-ACE of assessment of the physical effects of substance misuse, if not completed in CT1</p>	<p>Mini-ACE to determine mood disturbance in a physically ill patient, if not completed in CT2</p> <p>Mini-ACE of an examination of a child or a patient with learning disability including an appropriate physical examination, if not completed in CT2. This assessment must be conducted by an appropriate specialist</p>
2 Demonstrate the ability to construct formulations of patients' problems that include appropriate differential diagnoses			
	By the end of CT1 the trainee should demonstrate the ability to construct a formulation on an adult patient who has any of the common psychiatric disorders,	By the end of CT2, the trainee should demonstrate the ability to independently construct a formulation on adult patients who present with a full range of psychiatric	By the end of CT3, the trainee should demonstrate the ability to construct a formulation of patients with psychiatric disorders who have a learning disability or are

	including affective disorders; anxiety disorders; psychotic disorders; and personality disorders	disorders including disorders of cognitive impairment; substance misuse disorders; and organic disorders	children
2a Diagnosis	CBD of differential diagnosis in a patient with a common presenting problem	CBD in a person presenting to older adults service if not completed in CT1	CBD of differential diagnosis in a child or patient with learning disability, if not completed in CT2. This assessment must be conducted by an appropriate specialist
2b Formulation	CBD of an adult patient with a common presenting problem to describe the factors in the aetiology of the problem	CBD of an adult patient with a more complex problem, to describe the factors in the aetiology of the problem, if not completed in CT1	<p>CBD to discuss the assessment of a child or patient with learning disability, if not completed in CT2. This assessment must be conducted by an appropriate specialist</p> <p>CBD to discuss the assessment of a child or patient with learning disability focusing on the possibility of maltreatment, neglect or exploitation, if not completed in CT2. This assessment must be conducted by an appropriate specialist</p>
3 Demonstrate the ability to recommend relevant investigation and treatment in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological and psychological investigations and then to construct a comprehensive treatment plan addressing biological, psychological and socio-cultural domains			
	By the end of CT1 the	By the end of CT2, the	By the end of CT3, the

	trainee should demonstrate the ability to describe further investigations and negotiate treatment with an adult patient who has any of the common psychiatric disorders, including affective disorders; anxiety disorders; psychotic disorders; and personality disorders	trainee should demonstrate the ability to describe further investigations and negotiate treatment on adult patients who present with a full range of psychiatric disorders including disorders of cognitive impairment; substance misuse disorders; and organic disorders	trainee should demonstrate the ability to negotiate treatment options in more challenging situations and with patients with psychiatric disorders who have a learning disability or are children
3a Individual consideration	Mini-ACE negotiating a treatment plan or discussing investigations with patient, family and/or carers		Mini-ACE's discussing treatment options in more challenging situations such as with a reluctant patient, i.e. someone with limited insight, an acutely physically ill patient and a patient whose first language is not English, if not completed in CT2
3b Investigation	CBD to discuss planning investigations in an adult patient with a common presenting problem	<p>CBD to discuss planning investigations in an adult patient with a more complex problem, if not completed in CT1</p> <p>CBD of planning investigation of a person with suspected dementia or delirium, if not completed in CT1</p>	CBD to discuss referral for specialist psychotherapeutic assessment, if not completed in CT2
3c Treatment planning	Mini-ACE and CBD, repeated		CBD to demonstrate awareness of issues in

	<p>several times, focusing on different conditions</p> <p>CBD to discuss psychological treatment of a case</p>		<p>prescribing in common physical disease states, such as liver or cardiac disease, if not completed in CT2</p> <p>CBD of treatment planning for a child or a patient with learning disability, if not completed in CT2. This assessment must be conducted by an appropriate specialist</p>
4 Based on a comprehensive psychiatric assessment, demonstrate the ability to comprehensively assess and document patient's potential for self-harm or harm to others. This would include an assessment of risk, knowledge of involuntary treatment standards and procedures, the ability to intervene effectively to minimise risk and the ability to implement prevention methods against self-harm and harm to others. This will be displayed whenever appropriate, including in emergencies			
	<p>By the end of CT1, the trainee should demonstrate the ability to perform a competent risk assessment and construct a defensible risk management plan for an adult patient with a common psychiatric disorder</p>	<p>By the end of CT2, the trainee should demonstrate the ability to perform a competent risk assessment and construct a defensible risk management plan for an older adult patient and in more challenging situations</p>	<p>By the end of CT3, the trainee should demonstrate the ability to perform a competent risk assessment and construct a defensible risk management plan for patients with psychiatric disorders who have a learning disability or are children and be able to perform a competent assessment of a patient who may require intervention using mental health or capacity legislation</p>
4a All clinical situations	Mini-ACE of risk assessment interview	Mini-ACE of risk assessment interview	

	CBD of a risk assessment and management plan	with an older person, if not completed in CT1	
4b Psychiatric emergencies	Several Mini-ACE's of assessing risk in emergency situations (A&E Departments, Crisis Team, out-of hours), at least one must be conducted by a consultant assessor	CBD of the assessment and management of a violent or other serious untoward incident. This may involve management of violence, absconson or seclusion, if not completed in CT1	Mini-ACE of assessment for rapid trainquisation, if not completed in CT2 CBD of an emergency in child or adolescent psychiatry or in the psychiatry of learning disabilities, if not completed in CT2. This assessment must be conducted by an appropriate specialist
4c Mental health legislation	CBD of emergency assessment		CBD or mini-ACE of using Mental Health legislation in relation to capacity and consent, if not completed in CT2 CBD of Mental Health legislation as applied to the mentally disordered offender
4d Broader legal framework			Clinical supervisor report
5 Based on the full psychiatric assessment, demonstrate the ability to conduct therapeutic interviews; that is to collect and use clinically relevant material. The doctor will also demonstrate the ability to conduct a range of individual, group and family therapies using standard accepted models and to integrate these psychotherapies into everyday treatment, including biological and socio-cultural interventions			
	By the end of CT1, the trainee should demonstrate the ability to think in psychological terms about patients who have mental health problems and to foster	By the end of CT2, the trainee should demonstrate the ability to conduct a course of brief or long psychological therapy under supervision	By the end of CT3, the trainee should demonstrate the ability to conduct a second course of psychological therapy of a different duration and in a different

	therapeutic alliances		modality from that conducted in CT2
5a Psychological therapies	CBDGA (Two in the year)	SAPE for long or short case (must achieve at least satisfactory in all domains)	SAPE for a different modality and duration from CT2 (must achieve at least satisfactory in all domains) CBD to discuss psychological therapy in routine psychiatric practice, if not completed in CT2
6 Demonstrate the ability to concisely, accurately and legibly record appropriate aspects of the clinical assessment and management plan			
	By the end of CT1, the trainee should demonstrate the ability to properly record appropriate aspects of clinical assessments and management plans	During CT2, the trainee should continue to demonstrate the ability to properly record appropriate aspects of clinical assessments and management plans	By the end of CT3, the trainee will be able to describe the structure, function and legal implications of medical records and medico-legal reports
6a Record keeping	To be assessed every time a CBD is conducted (at least four in the year)	To be assessed every time a CBD is conducted (at least four in the year)	To be assessed every time a CBD is conducted (at least four in the year, one of which should include a medico-legal report that the trainee has written, this latter may be in 'shadow form')
7 Develop the ability to carry out specialist assessment and treatment of patients with chronic and severe mental disorders and to demonstrate effective management of these disease states			
	By the end of CT1, the trainee should be able to describe long-term severe and enduring mental illnesses and the	By the end of CT2, the trainee should demonstrate the ability to assess capacity in a person who has cognitive	By the end of CT3, the trainee should demonstrate the ability to construct a treatment plan for a patient who

	issues involved in the care and treatment of people with these problems	impairment and be able to construct a medication treatment plan of an older person's mental illness	has a severe and enduring mental illness and for either a child or person with learning disability who has a long-term neurodevelopmental disorder
7a Management of severe and enduring mental illness	CBD of a review of the care or treatment of a patient who has a severe and enduring mental illness	<p>Mini-ACE assessing capacity in a person with cognitive impairment, if not completed in CT1</p> <p>CBD of psycho-pharmacological management of an older person's illness, if not completed in CT1</p>	<p>CBD of a care of a person who has a severe and enduring mental illness. The focus is to explore how well the trainee can understand the illness from the patient's point of view. May be completed in CT2 or CT3</p> <p>CBD/mini-ACE of a care of a person who has a severe and enduring mental illness. The focus is the trainee's understanding of quality of life. May be completed in CT2 or CT3</p> <p>Mini-ACE's assessing several aspects of capacity or changes in capacity in a single patient over time, if not completed in CT2</p> <p>CBD to discuss understanding of the assessment of capacity and its consequences if not completed in CT2</p>

			<p>ACE of history taking from a paediatric neuropsychiatry case or a child with ADHD or autism or a person with learning disability who has one of these problems, if not completed in CT2. This assessment must be conducted by an appropriate specialist</p> <p>CBD to discuss management of a child with a long-term condition or with a person with learning disability, if not completed in CT2. This assessment must be conducted by an appropriate specialist</p>
8 Use effective communication with patients, relatives and colleagues. This includes the ability to conduct interviews in a manner that facilitates information gathering and the formation of therapeutic alliances			
	By the end of CT1, the trainee should demonstrate the ability to competently conduct clinical interviews with patients	During CT2, the trainee should continue to demonstrate the ability to conduct clinical interviews with patients who have increasingly complex needs	By the end of CT3, the trainee should demonstrate the ability to conduct clinical interviews in increasingly challenging situations, including with children or people who have learning disabilities
8a Within a consultation	Mini-ACE's to demonstrate a skillful approach to	Two rounds of Mini-PAT	Mini-ACE or ACE of interviews with a child or patient with a learning

	<p>communicating, including use of emotional sensitivity</p> <p>Two rounds of Mini-PAT</p>		<p>disability, if not performed in CT2. This assessment must be conducted by an appropriate specialist</p> <p>Mini-ACE/ACE of interview with a patient who has chronic delusions and hallucinations (if not completed in CT2)</p> <p>Two rounds of Mini-PAT</p>
9 Demonstrate the ability to work effectively with colleagues, including team working			
	<p>By the end of CT1, the trainee should demonstrate the ability to work effectively as a member of a mental health team</p>	<p>By the end of CT2, the trainee should demonstrate the ability to work effectively as a member of a mental health team that works with older people</p>	<p>By the end of CT1, the trainee should demonstrate the ability to work effectively as a member of a mental health team that works with children or with people who have learning disabilities</p>
9a Clinical teamwork	<p>CBD of patient who is being seen by other members of the MDT</p> <p>Two rounds of Mini-PAT</p> <p>Supervisors' reports</p>	<p>CBD of older person who is being seen by members of the older persons' CMHT, if not performed in CT1</p> <p>Two rounds of Mini-PAT</p> <p>Supervisors' reports</p>	<p>CBD of child or patient with learning disability who is being seen by other health or social care agencies, if not performed in CT2. This assessment must be conducted by an appropriate specialist</p> <p>Two rounds of Mini-PAT</p> <p>Supervisors' reports</p>
10 Develop appropriate leadership skills			

	By the end of CT1, the trainee should demonstrate the ability to take on appropriate leadership responsibility, for example by acting as rota coordinator	By the end of CT2, the trainee should demonstrate the ability to take on appropriate leadership responsibility in increasingly challenging situations, for example by acting as a representative on a working group	By the end of CT3, the trainee should demonstrate the ability to take a lead in an aspect of the work of a mental health team
10a Effective leadership skills	Two rounds of Mini-PAT Supervisors' reports	Two rounds of Mini-PAT Supervisors' reports	Two rounds of Mini-PAT DONCS/CBD focused on the trainee's participation in a multi-disciplinary meeting planning the care of patients, if not completed in CT2 Supervisors' reports
11 Demonstrate the knowledge, skills and behaviours to manage time and problems effectively			
	By the end of CT1, the trainee should demonstrate the ability to organise their work time in the context of a mental health service effectively, flexibly and conscientiously and be able to prioritise clinical problems	By the end of CT2, the trainee should demonstrate the ability to organise their work time more independently	By the end of CT3, the trainee should demonstrate awareness of the importance of continuity of care
11a Time management	Two rounds of Mini-PAT	Two rounds of Mini-PAT	CBD focused on the trainee's contribution over a period of several months to the care of a patient with enduring mental health needs. May be completed in CT 2 or 3

			Two rounds of Mini-PAT
11b Communication with colleagues	Two rounds of Mini-PAT Supervisors' reports	Two rounds of Mini-PAT Supervisors' reports	Two rounds of Mini-PAT Supervisors' reports
11c Decision making	Supervisors' reports	Supervisors' reports	Supervisors' reports
11d Continuity of care	Supervisors' reports	Supervisors' reports	Supervisors' reports
11e Complaints	Supervisors' reports	Supervisors' reports	Supervisors' reports
12 Demonstrate the ability to conduct and complete audit in clinical practice			
		By the end of CT2, the trainee should demonstrate the ability to perform and present an audit project	By the end of CT3, the trainee should demonstrate the ability to independently perform an audit project and apply its findings to the service as well as their own practice
12a Audit		Evidence of presentation of at least one complete audit project if not completed in CT1	Evidence of presentation of a second complete audit project demonstrating application to a service if not completed in CT2
13 to develop an understanding of the implementation of clinical governance			
	By the end of CT1, the trainee should demonstrate participation in clinical governance work, including an awareness of the importance incident reporting and knowledge of relevant clinical		By the end of CT3, the trainee should demonstrate the ability to deviate from clinical guidelines when clinically appropriate to do so

	guidelines		
13a Organisational framework for clinical governance and the benefits that patients may expect	Supervisors' reports	Supervisors' reports	Supervisors' reports
14 To ensure that the doctor is able to inform and educate patients effectively			
	By the end of CT1, the trainee should demonstrate the ability to advise patients about the nature and treatment of common mental illnesses, so the patient may be more able to participate in their treatment and the ability to advise patients about environmental and lifestyle factors and the adverse effects of alcohol, tobacco and illicit drugs		By the end of CT3, the trainee should demonstrate the ability to help a patient with a relapsing illness construct a relapse prevention plan.
14a Educating patients about illness and its treatment	Mini-ACE or CBD of advising a patient about the nature and treatment of their illness		Mini-ACE of negotiating a relapse prevention plan, if not completed in CT2 CBD around a patient with an enduring mental health problem focused on the trainee's understanding of how services may perpetuate and reinforce stigma. May be completed in CT2 or CT3
14b Environmental and lifestyle factors	Mini-ACE or CBD of advising a patient on environmental and lifestyle changes		
14c Substance misuse	Mini-ACE or CBD advising		

	a patient concerning the effects of alcohol, tobacco and illicit drugs on health and wellbeing		
15 To develop the ability to teach, assess and appraise			
	By the end of CT1, the trainee should demonstrate the ability to construct an effective learning plan	By the end of CT2, the trainee should demonstrate the ability to participate in appraisal	By the end of CT3, the trainee should demonstrate the ability to teach in a variety of settings and to conduct assessments
15a The skills, attitudes, behaviours and practices of a competent teacher	An effective individual learning plan outlining learning needs, methods and evidence of attainment	As CT1	As CT1 Completed AoT forms with evidence of reflection on feedback, if not completed in CT2
15b Assessment			Evidence of assessing Foundation Programme doctors and/or clinical medical students, if not completed in CT2
15c Appraisal		Completed NHS appraisal	Completed NHS appraisal
16 To develop an understanding of research methodology and critical appraisal of the research literature			
	By the end of CT1, the trainee should demonstrate the ability to base their practice on best evidence		By the end of CT3, the trainee should demonstrate an understanding of basic research methodology and critical appraisal applied to the study of psychiatric illness and its treatment
16a Research techniques			JCP to demonstrate an understanding of basic research methodology, if not completed in CT2

			JCP to demonstrate an understanding of the research techniques used in psychological therapies, if not completed in CT2
16b Evaluation and critical appraisal of research	JCP to demonstrate application of evidence to a clinical problem the trainee has encountered		<p>JCP to demonstrate use of critical appraisal techniques, if not completed in CT2</p> <p>JCP to demonstrate an understanding of the research base in psychological therapies and the particular difficulties in conducting research in this area, if not completed in CT2</p>
17 To ensure that the doctor acts in a professional manner at all times			
	By the end of CT1, the trainee should demonstrate an understanding of the tensions that can exist in the doctor patient relationship, issues relating to confidentiality and the sharing of information, professional codes of practice and conduct and responsibility for personal health		By the end of CT3, the trainee should demonstrate skills in limiting information sharing appropriately, skills in obtaining consent and performing a risk assessment in children or people with learning disabilities who have a mental health problem
17a Doctor patient relationship	CBD to demonstrate understanding of the emotional and		

	professional tensions that can exist in the doctor patient relationship,		
17b Confidentiality	CBD to demonstrate appropriate sharing of information		CBD to demonstrate capacity to limit information sharing appropriately, if not completed in CT2
17c Consent	Mini-ACE of obtaining consent for treatment of a psychiatric disorder		Mini-ACE of obtaining informed consent in a child or patient with learning difficulties, if not completed in CT2. This assessment must be conducted by an appropriate specialist
17d Risk management	CBD of risk assessment and management of an adult patient with a common psychiatric problem		<p>CBD of risk assessment and management in an adult patient with a more complex psychiatric problem, if not completed in CT2</p> <p>CBD of risk management in a child or patient with learning difficulties, if not completed in CT2. This assessment must be conducted by an appropriate specialist</p>
17e Recognise own limitations	CBD to demonstrate an appreciation of the extent of one's own limitations		
17f Probity	Supervisors' reports	Supervisors' reports	Supervisors' reports
17g Personal health	Supervisors' reports	Supervisors' reports	Supervisors' reports
18 To develop the habits of lifelong learning			
	By the end of CT1, the	During CT2, the trainee	By the end of CT3, the

	trainee should demonstrate the ability to use learning opportunities to the greatest effect	should continue to demonstrate the ability to use learning opportunities to the greatest effect	trainee should demonstrate the ability to use systems to maintain up-to-date practice and demonstrate an understanding of the relevance of professional bodies
18a Maintaining good medical practice		Supervisors' reports	Supervisors' reports
18b Lifelong learning	An effective individual learning plan outlining learning needs, methods and evidence of attainment	An effective individual learning plan outlining learning needs, methods and evidence of attainment	An effective individual learning plan outlining learning needs, methods and evidence of attainment
	Evidence of self reflection	Evidence of self-reflection	Evidence of self-reflection
18c Relevance of outside bodies	Evidence of continued GMC registration	Evidence of continued GMC registration	Evidence of continued GMC registration
	Evidence of registration with the Royal College of Psychiatrists	Evidence of registration with the Royal College of Psychiatrists	Evidence of registration with the Royal College of Psychiatrists

Guide for ARCP panels in Advanced Training in Forensic Psychiatry ST4-ST6

Intended learning outcome	ST4	ST5	ST6
Be able to perform specialist assessment of patients and document relevant history and examination on culturally diverse patients to include: <ul style="list-style-type: none"> • Presenting or main complaint • History of present illness • Past medical and psychiatric history • Systemic review • Family history • Socio-cultural history • Developmental history 			
	<p>By the end of ST4 the trainee will be able to take a comprehensive history from a patient presenting to an inpatient forensic service. Core conditions to be assessed are in particular schizophrenia, affective disorders, all other psychotic conditions in ICD, all personality</p>	<p>By the end of ST5 the trainee will be able to independently assess under supervision any patient presenting to a specialist forensic service e.g. prison, police station, NHS or Independent hospital.</p>	<p>By the end of ST6 the trainee will be able to supervise the assessment of a forensic patient by a core trainee. They will be able to independently assess the most complex cases, involving multilayered complicating factors including personality disorder, substance</p>

	<p>disorder especially antisocial, paranoid and borderline, developmental disorders including Aspergers syndrome and organic disorders. The understanding and assessment of substance misuse and its role in forensic presentation and risk is essential.</p> <p>Understand the legal context of forensic patient assessment. Understand the nature of forensic psychiatric services and differing institutions that may affect patient presentation. Understand the relevance of physical, procedural and relational security to patients' clinical needs and presentation.</p>	Assess forensic patients in differing levels of security to identify clinical need and understand the balance needed for public protection.	misuse, medico legal and diversity issues.
1b Patient examination, including mental state examination and physical examination	ACE of a new patient admitted to forensic inpatient unit	ACE or CBD New assessment for potential admission to forensic unit.	ACE or CBD Urgent assessment eg, in prison, police custody, NHS or

	<p>CBD of a case to specifically explore links between risk issues and psychopathology.</p> <p>DOPS Assessing safety of examination facility for patient consultation.</p>	<p>CBD of a forensic patient from a background where diversity issues relevant to presentation, risk and management.</p>	<p>independent hospital.</p> <p>DONCS Observe supervision of other health professional at more junior level.</p> <p>CBD of a new patient with complex and multiple psychopathology including mental illness, substance misuse, personality disorder. To formulate the case and present management plans</p>
2 Demonstrate the ability to construct formulations of patients' problems that include appropriate differential diagnoses			
	<p>By the end of ST4, the trainee will, be able to independently construct a formulation for a patient in a specialist forensic inpatient unit</p>	<p>By the end of ST5, the trainee will independently construct a formulation of a patient presenting newly to a specialist forensic service.</p>	<p>By the end of ST6, the trainee will be able to supervise students, foundation and core trainees in the development of an appropriate formulation for patients in a forensic service.</p>

	CBD of several Patients discussing mental health act and issues surrounding detention, relevant sections appeals procedures, process of transfer from prison and court ordered detention.	CBD of several cases of forensic patients with different diagnoses to develop formulations, taking account of psychopathology and risk.	CBD of several cases of forensic patients where there are medico-legal issues e.g. Fitness to plead, fitness to interview, insanity, diminished responsibility, provocation, risk assessment and sentencing.
3 Demonstrate the ability to recommend relevant investigation and treatment in the context of the clinical management plan. This will include the ability to develop and document an investigation plan including appropriate medical, laboratory, radiological and psychological investigations and then to construct a comprehensive treatment plan addressing biological, psychological and socio-cultural domains			
	By the end of ST4, the trainee will be able to independently formulate a plan of investigations and treatment for a newly admitted forensic inpatient.	By the end of ST5, the trainee will be able to independently formulate a plan of investigation and treatment for a new patient presenting to specialist forensic services, especially in prison, police custody and the community.	By the end of ST6, the trainee will be able to comprehensively manage a forensic patient presenting a range of complex conditions including personality disorder, mental illness, learning disability with a multidisciplinary team, including managing, the CPA process, prison transfers and independent liaison with relevant third parties: -police, government agencies, courts, solicitors.

	<p>CBD of a new referral to demonstrate the use of relevant investigations i.e. physical, psychiatric, social, legal including liaison with multi professional groups.</p> <p>CBD Of treatment plans for newly admitted forensic patients</p>	<p>MINI ACE Management of seclusion following local policy and agreed national standards.</p> <p>CBD of referral of Forensic patient to another service highlighting relevant factors in diagnosis, risk and demonstrating appropriate use of resources with short and long term treatment planning.</p>	<p>CBD Patient moving between levels of security, highlighting issues of clinical needs in context of security.</p> <p>Mini Ace to demonstrate an ability to grant leave to a forensic patient ensuring multidisciplinary appraisal within a relevant legal framework.</p>
4 Based on a comprehensive psychiatric assessment, demonstrate the ability to comprehensively assess and document patient's potential for self-harm or harm to others. This would include an assessment of risk, knowledge of involuntary treatment standards and procedures, the ability to intervene effectively to minimise			

risk and the ability to implement prevention methods against self-harm and harm to others. This will be displayed whenever appropriate, including in emergencies

	<p>By the end of ST4, the trainee will be able to develop comprehensive clinical risk assessment of forensic patients.</p> <p>The trainee will have gained recognized approval under relevant MHA and will demonstrate an understanding of the legal framework for detention and treatment of forensic inpatients including restriction orders.</p> <p>The trainee will demonstrate ability to write formal reports for Mental Health Review Tribunals (MHRT), hospital managers, and equivalents as well as discharge letters and reports for the relevant Government bodies that administer Restriction Orders.</p>	<p>By the end of ST5 the trainee will competently Use standardized risk assessment tools understanding theory, strengths and limitations of actuarial approaches</p> <p>The trainee will demonstrate skill in developing plans for Medico-legal management of incompetent forensic inpatient or capacitous patient refusing treatment.</p> <p>Demonstrate skills in writing formal reports addressing simple medico-legal issues including medical disposal at court, advice on Restriction Orders.</p> <p>Demonstrate ability to give evidence to courts</p>	<p>By the end of ST6 the trainee will demonstrate the ability to develop risk management plans with a multidisciplinary team. Able to manage risks of forensic patients as inpatients, community patients, prisoners and other specialist facilities. Management of the specific risks of Specialist populations of forensic patients presenting with high risk behaviours particularly persistent severe self harm, and including those at high risk in prisons</p> <p>Understand and develop plans for the medico legal management of patients out with hospital for the purposes of MH legislation including the transfer of prisoners</p>
--	---	---	---

	<p>The trainee will give appropriate evidence to hospital managers, MHRT and equivalent hearings</p>	<p>on simple medico legal issues e.g. restriction order disposal</p>	<p>and those in police custody. Understand legal clinical and ethical issues of the emergency treatment of prisoners under common law.</p> <p>The trainee will be able to manage a patient requiring recall to hospital.</p> <p>Manage legal aspects of discharging a patient including remission to prison, discharge to step down services, discharge to the community including compulsory treatment in the community.</p> <p>Understand the management of a potential hostage situation</p> <p>The trainee will demonstrate the ability to write formal reports to 3rd parties including to courts legal representatives,</p>
--	--	--	--

			<p>judicial bodies covering complex issues especially fitness to plead, mental condition defenses, dangerousness and sentencing.</p> <p>The trainee will be able to give evidence to courts on more complex medico legal issues e.g. fitness to plead, defenses, dangerousness</p>
--	--	--	--

4a Risk assessments	<p>DOPS or CBD demonstrating an understanding of the use of structured and actuarial risk assessment tools</p> <p>MINI-ACE Clinical risk assessment for forensic inpatient</p>	<p>MINI ACE/CBD Risk assessment for external agencies including MHRT, courts.</p> <p>DOPS or CBD demonstrating an understanding of the use of structured and actuarial risk assessment tools.</p>	<p>MINI-ACE CPA of forensic patient dealing with risk management in multi-professional setting.</p> <p>DONCS of organising and leading a multidisciplinary team to assess and manage a forensic psychiatric emergency developing both short and long term plans.</p>
4b Psychiatric emergencies	<p>Mini-ACE or CbD of managing a psychiatric emergency in a forensic inpatient setting, including rapid tranquilization, seclusion management and reporting arrangements.</p> <p>MINI ACE/CBD Assessment and review of a patient involved in incident demonstrating</p>	<p>Mini-ACE or CbD of the assessment and management a psychiatric emergency presenting to forensic services including in police custody, prison, or in the community.</p> <p>CbD or DONCS of the management of an incident of absconding</p> <p>MINI ACE/CBD</p>	<p>DONCS Team management of a forensic psychiatric emergency including seclusion management.</p>

	appropriate multidisciplinary assessment and management of the incident.	Assessment and review of an emergency presenting in police custody, prison and community	
4c Mental health legislation	<p>MINI ACE of assessing a capacity to consent to treatment.</p> <p>CBD of legal issues of forensic patient detained on a restriction order.</p>	CBD/Mini ACE Medico-legal management of incompetent patient or capacitous patient refusing treatment.	<p>CPD of medico legal aspects of emergency management of prisoners.</p> <p>CBD of management of a patient requiring recall.</p>
4d Broader legal framework	<p>CBD of several formal reports written for statutory review tribunals</p> <p>Ace of trainee giving evidence at a formal tribunal hearing</p> <p>Evidence of satisfactory completion of an appropriate course to gain approval to exercise powers under the relevant mental health legislation</p>	<p>CBD of formal reports for above court hearings to address simple medico-legal issues including medical disposal at court, advice on Restriction Orders</p> <p>DONCS of trainee giving evidence to a Court on simple medico legal issues e.g. restriction order disposal</p>	<p>CBD of formal reports of formal reports to 3rd parties including to courts legal representatives, judicial bodies covering complex issues.</p> <p>DONCS of trainee giving evidence in a formal setting such as court or during a formal training exercise on more complex medico legal</p>

			issues e.g. fitness to plead, defenses, dangerousness
5 Based on the full psychiatric assessment, demonstrate the ability to conduct therapeutic interviews; that is to collect and use clinically relevant material. The doctor will also demonstrate the ability to conduct a range of individual, group and family therapies using standard accepted models and to integrate these psychotherapies into everyday treatment, including biological and socio-cultural interventions			
5a Psychological therapies	By the end of ST4, the trainee will be able to perform an assessment of a forensic patient to review psychological treatment needs. The trainee will demonstrate an understanding of different psychotherapeutic approaches and the impact and therapeutic use of security.	By the end of ST5, the trainee will demonstrate the ability to engage in psychological treatment of forensic psychiatric patient.	By the end of ST6, the trainee will demonstrate the ability to manage a CPA of a forensic patient, discussing psychological issues and prescribing relevant psychological therapies. The will demonstrate an understanding of the impact of victims in the management of a forensic patient
	CBD of assessment of psychological needs.	SAPE of relevant psychological treatment of forensic psychiatric patient.	Mini-ACE of CPA focused on psychological understanding and treatment approaches.
7 Develop the ability to carry out specialist assessment and treatment of patients with chronic and severe mental disorders and to demonstrate effective management of these disease states			
7a Management of severe and enduring mental illness	By the end of ST4, the trainee will	By the end of ST5, the trainee will	By the end of ST6, the trainee will

	demonstrate the ability to undertake assessments of forensic patients with long-term needs.	demonstrate the ability to develop rehabilitation and management plans for long-term forensic patient with enduring problems demonstrating an understanding of <ul style="list-style-type: none"> - Institutionalization - Principles of recovery 	demonstrate the ability to manage a CPA of a forensic patient with long-term enduring problems of intractable symptoms and risk
	ACE or CBD of an assessment of a forensic patient with long-term needs.	CBD of management strategies for long term patient	DONCS of conducting a CPA review
8 Demonstrate effective communication with patients, relatives and colleagues. This includes the ability of the doctor to conduct interviews in a manner that facilitates information gathering and the formation of therapeutic alliances			
	By the end of ST4, the trainee will demonstrate the ability to effectively communication with forensic patients, relatives and professional colleagues.	By the end of ST5, the trainee will demonstrate the ability to conduct an independent assessment of patient with carers – especially information gathering, imparting relevant information, and understanding levels of confidentiality.	By the end of ST6, the trainee will demonstrate the ability to conduct an independent assessment of patient with communication difficulties. As part of which they will organise and appropriately utilise interpreters.

	Mini Ace of interaction with forensic patient	Mini ACE or CBD of interaction with carers and sensitive handling of information within limits of confidentiality.	ACE, mini ACE or CBD to explore how communication from disability or cultural differences affects assessment and management.	
9 Demonstrate the ability to work effectively with colleagues, including team working				
	By the end of ST4, the trainee will be able to describe and understand the role of a forensic psychiatrist and the roles and responsibilities of other members of an MDT. Understand the legal responsibilities of a forensic psychiatrist.	By the end of ST5, the trainee will demonstrate the ability to work with multidisciplinary teams and identify and resolve dysfunction within the team. Develop awareness of institutional dysfunction at individual and organization level and to effectively report and facilitate the management of difficulties.	By the end of ST6, the trainee will demonstrate the ability to effectively contribute to and where appropriate lead MDTs including CPA, discharge planning (S.117 or equivalent), Multi-Agency Public Protection Arrangements (MAPPA) (or Public Protection Arrangements Northern Ireland), Victim liaison, NHS management.	
	One round of Mini-PAT	One round of Mini-PAT	DONCS of contributing	

	Supervisors' reports	Supervisors' reports	to and chairing S117 discharge meeting (or equivalent), MAPPA (or equivalent), Victim liaison One round of Mini-PAT Supervisors' reports
10 Develop appropriate leadership skills			
	By the end of ST4, the trainee will demonstrate the ability to lead the MDT assessment of a forensic psychiatric patient, to coordinate and agree an initial management strategy.	By the end of ST5, the trainee will demonstrate the ability to lead the MDT clinical management meeting concerning a forensic psychiatric patient, setting treatment goals both short and long term	By the end of ST6, the trainee will demonstrate the ability to participate in a change management project, demonstrating an understanding of leadership strategies within the wider management framework.
	DONCS of trainee conducting a ward round One round of Mini-PAT Supervisors' reports	DONCS of trainee chairing the multidisciplinary team meeting One round of Mini-PAT Supervisors' reports	DONCS of trainee chairing a CPA/MAPPA (or equivalent) meeting One round of Mini-PAT Supervisors' reports
12 Demonstrate the ability to conduct and complete audit in clinical practice			
12a Audit	By the end of ST4, the trainee will	By the end of ST5, the trainee will	By the end of ST6, the trainee will

	demonstrate the ability to undertake an audit relevant to forensic in patient service as part of the unit audit cycle.	demonstrate the ability to conduct an audit project without direct supervision, be able to set standards and be able to demonstrate how the results of an audit project have contributed to quality improvement	demonstrate the ability to initiate supervise and present a different audit project from those conducted in ST4 and 5, with a junior colleague.
	Completed audit report	JCP of audit project	Audit presentation to MDT and completed audit report
13 to develop an understanding of the implementation of clinical governance			
13a Organisational framework for clinical governance and the benefits that patients may expect	By the end of ST4, the trainee will demonstrate an awareness of risk management issues and healthcare governance issues	By the end of ST5, the trainee will demonstrate an understanding of risk management issues and healthcare governance issues. Develop a capacity to use governance data e.g. monitor pattern of incidents in a secure unit and develop management strategies.	By the end of ST6, the trainee will demonstrate an ability to handle a Singular Untoward Incident (SUI) and ability to work nationally, regionally or locally to develop and implement clinical guidelines and care pathways (if not completed in ST5)
	Supervisors reports	Supervisors reports	Supervisors reports
15 To develop the ability to teach, assess and appraise			
	By the end of ST4, the	By the end of ST5, the	By the end of ST6, the

	trainee will demonstrate an ability to use a number of different teaching methods and an ability to conduct workplace-based assessments (WPBA's) for foundation or core trainees	trainee will demonstrate an understanding of the basic principles of adult learning and of different learning styles and demonstrate ability to assess medical student/ foundation doctor	trainee will demonstrate an ability to organise (including evaluate) educational events (if not completed in ST5) and an ability to conduct an appraisal of a colleague
15a The skills, attitudes, behaviours and practices of a competent teacher	<p>AoT of ward based undergraduate teaching.</p> <p>JCP of presentation of a paper from a relevant forensic journal</p> <p>Appraisal</p>	<p>CP of presentation of a forensic case to an academic forensic seminar</p> <p>AoT of small group teaching (if not completed in ST4)</p>	Record of an AoT performed on a junior colleague's teaching
15b Assessment	Record of WPBA's conducted on others	DONCS of shadow supervision session to core or foundation trainee	Log of supervision or support to non-medical members of the team assessing core or foundation trainees
15c Appraisal		Completed NHS appraisal	<p>Completed NHS appraisal</p> <p>DONCS on completion of foundation or core</p>

			trainee shadow ARCP appraisal form (if not completed in ST4)
16 To develop an understanding of research methodology and critical appraisal of the research literature			
	By the end of ST4, the trainee should be able to frame an appropriate research question in a forensic area, conduct a relevant literature search, write a comprehensive review of this literature and write a research protocol (this may be for a project that the trainee will conduct or it may be in 'shadow' form)	By the end of ST5, the trainee should demonstrate the ability to collect data and enter it into standard computer software (this may be from the trainee's own research or audit) and be able to demonstrate the incorporation of research findings in their everyday practice	By the end of ST6 should demonstrate the ability to prepare findings of research, audit or similar work for dissemination beyond the trainee's workplace and be able to communicate the importance of applying research findings to colleagues
16a research techniques	Special Interest/research supervisors reports or supervisor's report	Special Interest/research supervisors reports or supervisor's report	Copies of forensic publications/dissertation (if applicable) Special Interest/research supervisors reports or supervisor's report

16b Evaluation and critical appraisal of research	<p>DONCS on the evaluation of an original research paper of relevance to in-patient or out-patient forensic psychiatry.</p> <p>Supervisor's report</p>	Supervisor's report	<p>DONCS on the evaluation of an original research paper in a specialist area</p> <p>Supervisor's report</p>
17 To ensure that the doctor acts in a professional manner at all times			
	<p>By the end of ST4 the trainee will demonstrate an understanding of the issues surrounding confidentiality and the appropriate sharing of information and the need for safe and positive decision-making with respect to risk management with respect to risk management in forensic inpatients</p>	<p>By the end of ST5, the trainee will demonstrate an understanding of the need for safe and positive decision-making with respect to risk management for community forensic patients and specialised populations e.g. prisons</p>	<p>By the end of ST6 will not only exemplify the highest standards of professionalism in their own practice but will also demonstrate an ability to support and advise colleagues in dealing with complex professional interactions, including the safe and appropriate sharing of information, understanding relevant legal and professional frameworks e.g. Human rights legislation, Duties of a Psychiatrist, GMC guidance, MAPPA (or</p>

			equivalent) guidelines The trainee will demonstrate the ability to recognise the limits of expertise when preparing formal reports or giving evidence to formal bodies such as courts.
17a Doctor patient relationship	One round of Mini-PAT	One round of Mini-PAT	One round of Mini-PAT
17b Confidentiality	CBD on a case where confidentiality issues are salient.		Supervisor's report
17d Risk management	Mini-ACE or CBD on assessment of risk in a complex case		Mini-ACE or CBD on assessment of risk in a complex case in a specialist area (e.g EIP, AO, crisis, eating disorders, neuropsychiatry etc) if not conducted in ST5
17e Recognise own limitations	Log of cases where discussion with a senior colleague has been sought, due to knowledge limitations, and lessons learnt.	DONCS of providing clinical supervision (if not completed in ST4) Log of cases where discussion with a senior colleague has been sought, due to knowledge limitations, and lessons learnt.	Log of cases where the trainee has provided clinical supervision

17f Probity	Supervisors' reports	Supervisors' reports	Supervisors' reports
17g Personal health	Supervisors' reports	Supervisors' reports	Supervisors' reports
18 To develop the habits of lifelong learning			
	In this stage of training, the trainee will continue to demonstrate commitment to their professional development and to professionally-led regulation	In this stage of training, the trainee will continue to demonstrate commitment to their professional development and to professionally-led regulation	In this stage of training, the trainee will continue to demonstrate commitment to their professional development and to professionally-led regulation
18a Maintaining good medical practice	Supervisors' reports Reflective prose on issues raised in relation to clinical practice around GMC "good medical practice"	Supervisors' reports Reflective prose on issues raised in clinical practice around GMC "good medical practice"	Supervisors' reports Reflective prose on issues raised in clinical practice around GMC "good medical practice"
18b Lifelong learning	An effective individual learning plan outlining learning needs, methods and evidence of attainment Evidence of self-reflection	An effective individual learning plan outlining learning needs, methods and evidence of attainment Evidence of self-reflection	An effective individual learning plan outlining learning needs, methods and evidence of attainment Evidence of self-reflection
18c Relevance of outside bodies	Evidence of continued GMC registration	Evidence of continued GMC registration	Evidence of continued GMC registration
